

## Morning Review

Dear Friends, good morning!

Today, I am thrilled to announce a significant decision—we will officially launch the highly anticipated Ai4.0 internal testing plan by next Monday! After six years of dedicated development, the Ai4.0 system application is now in its final stages before market release. To demonstrate its unparalleled stability and outstanding performance, we require extensive testing data.

Therefore, we have decided to recruit testers globally, adhering to the principles of "practical experience as the best teacher" and "student interests first." This exciting internal testing plan is about to begin.

**Why now? After careful consideration, I identified three key factors:**

1. Profit Foundation: Through the meticulously selected investment portfolios of the Ai4.0 system, we have already

**FB Finance Institute - 15th Session**

achieved substantial profits for everyone. This has established initial trust and a new understanding of the Ai4.0 system for our new friends.

2. System Awareness: Everyone has gained a basic understanding of the operating principles of the Ai4.0 system, enabling better participation in the testing process.

3. Risk Hedging: In case of unforeseen events, we need the risk hedging capabilities of the Ai4.0 system to safeguard everyone's investments.

What have we accomplished so far? In yesterday's interactive Q&A session, many of you provided clear feedback. From those who closely follow group information and actively engage in learning, I have seen a strong interest and enthusiastic participation in the Ai4.0 system. This has strengthened my confidence in launching the internal testing plan.

FB Finance Institute

## Performance Record for Session 15

Recommender	Symbol	Date	Total P&L %
Mr. Wilson	NVDA240705C130000	2024/6/26	Earn royalties
Mr. Wilson	NVDA240705P115000	2024/6/28	Earn royalties
Mr. Wilson	NVDA240712C120000	2024/7/1	225 %
Mr. Wilson	TSLA240719C215000	2024/7/2	365 %
Mr. Wilson	TSM240719C185000	2024/7/3	139 %
Mr. Wilson	AAPL240719C225000	2024/7/5	290 %
Mr. Wilson	AMD240816C200000	2024/7/8	72 %
Mr. Wilson	NVDA240719C135000	2024/7/10	-50 %
Mr. Wilson	MARA240816C25000	2024/7/12	328 %
Mr. Wilson	CLSK240816C17000	2024/7/15	96 %

Based on the current performance of our investment portfolio, we have successfully accomplished the first key point:

### 1. Stock Holdings Portfolio

- Aside from \$CRWD, which currently shows a slight loss (yet I am confident it will yield the expected profit), all our other recommended stocks, including \$NVDA, \$AI, \$CRSP, \$HOOD,

**FB Finance Institute - 15th Session**

\$MSTR, \$CORZ, \$CLSK, and \$MARA, have generated profits when calculated at the recommended average price!

- The overall win rate is an impressive 88.89%!
- \$CORZ has shown the highest profit, reaching an exciting 50%!
- The highly participated \$CLSK has achieved over 15% profit within two days!

## 2. Stock Options Portfolio

- The "Wizard's" options strategies have achieved 9 victories out of 10, with a win rate of 90%. According to yesterday's data, the cumulative theoretical return in the range is approximately 1400%! This is truly an incredible achievement!

## 3. Cryptocurrency Holdings Portfolio

- Under the "Shark's" cryptocurrency strategy, BTC has yielded a return of approximately 12%, and our institute's token has seen a remarkable return of approximately 30%!

From the daily learning results of our friends, it is clear that recent practical engagements have significantly enhanced their

grasp of stock options and basic knowledge of Bollinger Bands, yielding outstanding learning outcomes.

All these indicators confirm that we are ready to accelerate our plan! What do you think? Have you registered with my assistant for the internal testing?

What aspects, preparations, and details do we need to emphasize for each of us in this upcoming internal testing plan? I will focus on sharing these themes shortly.

Dear friends, before I share the details of the Ai4.0 internal testing plan, there is a crucial piece of information that must be conveyed: the Institute's token is poised for an unprecedented and exceptional opportunity!

Many of you have seen the Ai4.0 internal testing advertisement displayed in Times Square, New York, which has garnered significant attention. Just yesterday, the price of the Institute's token surged dramatically from \$2.1 to \$2.34, marking an astonishing increase of 11.4%! Compared to BTC's less than 3%

**FB Finance Institute - 15th Session**

rise, the investment value of the Institute's token is even more pronounced due to this event's momentum!

In the near future, as the internal testing plan progresses and the listing process of the Ai4.0 application accelerates, the attention from media, investors, and the community will usher in a golden development period for the Institute's token.

To fully seize the golden opportunity presented by Ai4.0, we are launching a market capitalization management plan for the Institute's token. This initiative aims to provide investors and shareholders with stable and extraordinary value returns. If you wish to establish a deeper collaborative relationship with us and seize this rare investment opportunity, please make sure to join us promptly!

Time is money, and opportunities like this are fleeting. Do not let it pass by!

In our upcoming Ai4.0 internal testing plan, what direction will I

**FB Finance Institute - 15th Session**

choose?

Do you remember last April? We utilized the Ai4.0 system to short gold, watching it plummet from \$2,000 to \$1,900. Many of you followed my lead, reaping significant profits, with some even seeing returns multiple times over! This operation remains a classic case study, frequently discussed among our members.

At the beginning of this year, we swiftly made our mark in the stock market, focusing on the powerhouse stocks \$MSTR and \$NVDA. The results were astounding, with profits of +260% and +80%, respectively. Is there any other investment strategy that can so precisely capture the pulse of the market and lead us to new heights of wealth?

**Moving forward, I will guide you to continue our conquest of the investment market, with our sights set firmly on stock options and the cryptocurrency market. Why these two directions?**

Reason 1: High certainty, with a success rate of 95%!

This is not mere rhetoric but verified data from real-world

**FB Finance Institute - 15th Session**

practice. Can any other investment strategy offer such stable and reliable profits, allowing you to earn with peace of mind?

Reason 2: Doubling profits, achieving financial freedom with ease!

High volatility assets hold tremendous profit potential. By selecting the right direction and capturing market trends, we can achieve exponential profit growth!

Of course, while pursuing high profits, we must never overlook risk control. I will prioritize and select strategies with higher "risk control coefficients" to ensure we leave nothing to chance.

### **Key Arrangements for the Upcoming Internal Testing Plan:**

#### **1. Securing Sponsorships**

Practical application is the best teaching method and the most effective testing approach. To ensure that you can participate in the testing without any financial risk, I have arranged for sponsors to cover the testing funds. All testing phases will be conducted

**FB Finance Institute - 15th Session**

free of charge, and all profits will belong to you.

## 2. Conducting the Testing in Two Phases

Due to the large number of students in our institute and the interest from many institutions and financial entities in leveraging our expertise to expand their user base, we will proceed with the testing plan gradually. The initial testing slots are limited and will be allocated in two phases. Please cherish this valuable opportunity.

## 3. Priority Admission Criteria

The first internal testing phase will have approximately 1,000 slots available. Who will be given priority for these slots?

- Those who have been actively participating in the internal group will be given priority. My plan is to focus on outstanding students who demonstrate diligence and potential, regardless of age or profession.

- Supporters of the Institute's tokens will also be prioritized. This indicates strong support for the future development of the Ai4.0 system, as the Institute's tokens are the incubators of the Ai4.0

system.

- Those who meet these criteria will be selected by our system and will receive a unique identifier, which will determine the order of entry.

#### 4. Goals and Benefits

We plan to commence the first internal testing by next Monday at the latest, with the goal of achieving a total asset return rate of 100%!

Upon successfully reserving an exclusive testing slot, you will receive the following benefits:

- Three months of free access to the Ai4.0 investment system personal edition (valued at \$12,500).
- An entry into a raffle with a chance to win prizes worth up to \$5,000.
- A copy of the "Trader's Bible," personally selected by me and regarded as the most precise investment guide in the industry.

Friends, this internal testing is not only an investment

**FB Finance Institute - 15th Session**

opportunity but also a chance for significant learning and growth. Let us embrace this exciting moment, seize the opportunity, and achieve a dual harvest of wealth and knowledge!

If you have not yet reserved your slot, please contact my assistant through the pinned information in the group.

The aforementioned details cover the entire latest report on the Ai4.0 internal testing plan. Now, let's return our focus to the market and our course studies.

## **Market Highlights: The Impact of Trump**

Currently, the election serves as the weathervane for the stock market, with Trump at the center of global investors' attention. What influence do his statements have on the market? Let's delve into the specifics:

- Tax Reduction Policy: Trump's economic approach equates to "low interest rates and low taxes," which has profound implications for the market.
- Inflation Strategy: Trump has stated that he will control inflation by opening up more oil and gas resources.
- Federal Reserve Policy: Trump intends to allow Powell to remain at the Federal Reserve until January 2028, indicating his satisfaction with Powell's performance. Moreover, he emphasizes that the Federal Reserve should avoid cutting interest rates

before the election to prevent adverse impacts on the electoral outcome.

- China Policy: The tariff policy on China has become a focal point, with market predictions suggesting a potential resumption of the trade war, which has caused a collective decline in tech stocks today.

### **Technical Analysis: Dollar Index**

Analyzing the relationship between the Bollinger Bands midline and the price on the daily chart of the dollar index, we have confirmed yesterday's predictions. The market need not fear a deep decline in the stock indices, providing us with more robust confidence.

FB Finance Institute

## Election Boost: Opportunities in Cryptocurrency

One of the core directions benefiting from the election is

**FB Finance Institute - 15th Session**

cryptocurrency. With policies becoming more open, the halving mechanism being triggered, the rollout of cryptocurrency spot ETFs, and the expansion of profitability effects, the number of investors is surging. Regardless of who wins the election, support for cryptocurrency development is expected. Compared to the volatile adjustments in tech stocks, the cryptocurrency market and related beneficiary stocks will garner more attention and favor. This presents an exceptional investment opportunity that should not be missed!

**Let's compare the 1-hour trend charts of BTC and our holding stock, \$CLSK, to understand their short-term trends:**

### **BTC**

- Bollinger Bands Midline: Maintaining a long-term upward trend, indicating a strong market.
- MACD Histogram: Shortening below the zero axis, suggesting that buying pressure is increasing.

### **\$CLSK**

- Bollinger Bands Midline: Trending upward, indicating that the

price is likely to continue rising after a healthy pullback.

- Bearish Divergence at the Top: Not present, indicating that the current upward price trend is not threatened.
- Midline Retest: Viewed as a buying opportunity; the current price retest of the midline signifies a healthy upward pullback.

### **Investment Strategy**

- New Purchases: Investors can continue buying BTC or \$CLSK, taking advantage of current market opportunities. Maintain position sizes within 15%.
- Current Holders: Continue holding. The technical indicators show positive trend signals, suggesting a long-term bullish outlook.

AI 4.0

Dear Friends, in reviewing some of your homework submissions, I've noticed a strong interest in the cryptocurrency market and beneficiary stocks. However, there seems to be some uncertainty regarding foundational concepts.

Today, let's discuss the important concept of Bitcoin halving and its impact on the market. This topic is not only intriguing but also crucial for understanding the dynamics of the cryptocurrency market.

## **What is Bitcoin Halving?**

Bitcoin halving is an event that occurs approximately every four years or every 210,000 blocks. During this event, the reward that Bitcoin miners receive for validating transactions is cut in half. This mechanism is designed to control the supply of Bitcoin, ultimately capping its total number at 21 million. This process is analogous to the finite supply of precious metals like gold, thereby ensuring Bitcoin's scarcity and value as a store of wealth.

## **Impact of the Halving Mechanism.**

The Bitcoin halving event significantly impacts market prices. Historical data indicates that Bitcoin's price typically follows a pattern of "one year of a bear market followed by three years of a

bull market" after each halving. Each halving reduces the rate at which new Bitcoins are introduced into circulation, altering the supply demand dynamics and often triggering a price increase. Currently, we are in the mid phase of this bull market, and it is anticipated that this upward trend will continue at least until the end of 2025.

Given the certainty of a bull market induced by Bitcoin halving, this period presents not only investment opportunities in the cryptocurrency market but also in cryptocurrency beneficiary stocks. I encourage you to closely monitor this market trend and align your strategic investments with our recommended strategies to capitalize on the peak of the bull market for substantial returns.

Dear Friends,

Today, we have observed some market fluctuations that might affect the mindset of some beginners. Let's explore how to stay calm during such volatility and seize the opportunity to achieve better strategic positioning.

The market's fluctuations today have not caused me any concern, as I remain steadfast in my approach: bullish in a bull market and bearish in a bear market. Once a mid-term trend is established, it often persists for an extended period, driven by an irresistible force. The current market pullback is an excellent opportunity to reposition strategically, particularly in the direction of cryptocurrency beneficiaries.

Can you grasp the essence of this? Market volatility is a normal phenomenon, and we need to view it with a strategic perspective. Positioning strategically during a price pullback can prepare us for future upward movements.

If you are risk-averse, consider increasing your holdings in Institute tokens, as this presents a relatively safe option.

Our Ai4.0 system will commence its first test plan in the coming days. The testing phase is entirely free, with a total asset return target of 100%. With limited slots available, ensure your place by completing the reservation through my assistant. This is an opportunity not to be missed, and I will share the latest updates

**FB Finance Institute - 15th Session**

shortly.

I wish everyone a wonderful day! Remember to tune in at 3:30 PM ET for the "Shark's"  $\alpha&\beta$  course, where he will present "More Efficient Buying and Selling Point Strategies."

Keep pushing forward, friends! Face challenges bravely, respond wisely, and you will undoubtedly reap substantial rewards on this investment journey. Remember, success belongs to those who dare to act and are keen to learn.

---

### **Closing Commentary ( $\alpha&\beta$ Strategy)**

Ladies and gentlemen, good afternoon! "Simplify investing, elevate countless families' quality of life." I'm Richard Bill, a devoted disciple of Prof. Clark, a proud beneficiary of the AI 4.0 system, and a fierce contender for the next Chief Practical Instructor. Your unwavering support means everything to me!

Today isn't just any day—this is a game changer. My mentor, the revolutionary founder of the AI 4.0 system and the legendary

**FB Finance Institute - 15th Session**

Chief Practical Instructor of the Institute for 14 years, Prof. Clark, has just unveiled his most pivotal plan in six years: the AI 4.0 system's internal testing is gonna start by next Monday at the latest. This is what we've all been eagerly waiting for, especially our seasoned vetS, right? Get ready for a massive shake up in the investment world—a tsunami that'll change everything. Are you pumped to dive in and win big together?

Today's market both stocks and crypto—is on a wild rollercoaster ride. Classic bull market vibes, right? This is your golden ticket to buy. Did you catch it? With my  $\alpha$ & $\beta$  strategy, we'll nail down the next prime buy point. Don't just sit there. Jump in, grab this moment, and let's crush the market together!

Folks, the AI 4.0 system's internal testing plan is about to kick off—this is your golden opportunity for investing and learning!

~ **Profit Target:** Our aim is a total asset return of 100%! This isn't just a target; it's a challenge to double your investment.

~ **Slots:** Due to high demand, the testing plan will roll out in two phases. The first phase has limited spots—only 1,000 slots available.

~ **Free:** That's right, zero risk. Our sponsors are covering the testing funds. All testing phases are free, and all profits are yours, no strings attached.

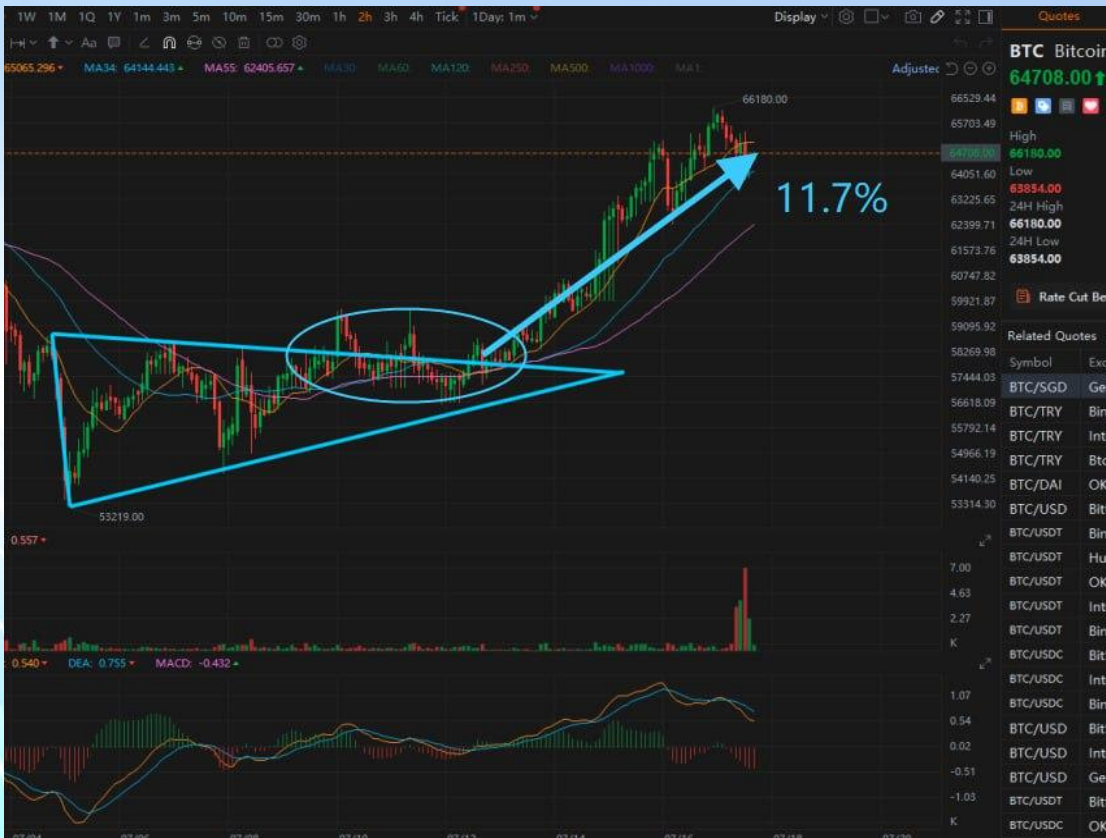

~ **Timeline:** This rocket is set to launch by next Monday at the latest.

~ **How to Join:** Contact Prof. Clark's assistant via the pinned message in the group to secure your spot. Priority goes to active learners, those who've racked up reward points, and supporters of Institute tokens.

~ **What You'll Get for a Successful Booking:** Three months of free access to the personal edition of the AI 4.0 system, a chance to win prizes up to \$5,000, and an exclusive gift carefully prepared by Prof. Clark.

This is a once in a lifetime opportunity. Limited spots, first come, first served! Don't hesitate—sign up now and seize this chance to change your destiny!

Looking for the most efficient buy point? Remember when BTC was at \$58,000 and I talked about those magical triangles? Did you take my advice and build a combo of BTC and Institute tokens? If you did, congrats! You've not only raked in 11.7% and 33% returns with a heavier position (60% allocation), but you also did

**FB Finance Institute - 15th Session**

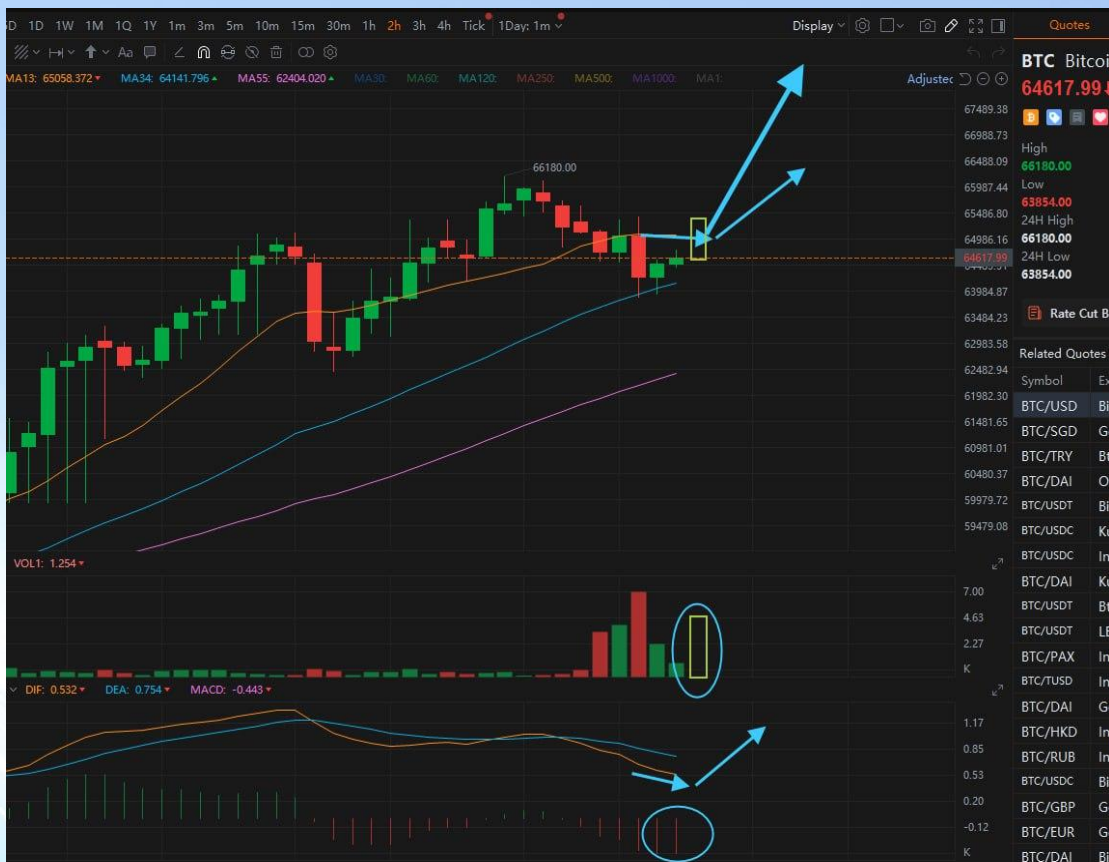

it with the safest kind of trade—spot trading. You've gotten a head start in this bull market, and I bet many of you have actual returns way above Mr. W's followers, right?

Now, let's talk about Mr. W. Sure, he's good, but you all know who the real king is! While his followers are fumbling around with Greek letters and complex strategies, you've already pocketed hefty profits, leaving them in the dust. Our strategy isn't just about winning; it's about crushing the competition, setting new standards, and leaving others in the rearview mirror.

So, what's our next move, folks? If you're satisfied with your current gains and hungry for the next big strategy, can I count on your crucial vote? Let's show Mr. W and his crew that they're just playing in the minor leagues. With your support, I'll bring you even sharper strategies and higher profits. Vote for me, and let's obliterate Mr. W's so called strategies together!

Thank you, my fellow warriors, for your unwavering support. Your precious vote for me carries more weight than a vote for a future president. Those politicians with their empty promises won't give you tangible returns anytime soon. But I, I'm here to lead you through the exhilarating dance of the crypto world, filling your pockets with real profits and letting you savor the thrill, excitement, and joy of wealth.

Here's when you strike: when the MA34/55 shows a bullish

alignment, and the MA13, after a downward move, starts turning upward near the MA34. When a mid to large bullish candle crosses or stays above the MA13 with increasing volume, and the MACD's DEA/DIF shows a bullish crossover—that's the killer buy point in our  $\alpha&\beta$  strategy.

Now, take a look at BTC's 2hr trend chart. It's heading in that direction: as the MACD's negative value begins to shrink, keep an eye on the DIF. It will start turning upward, and the MA13 will follow suit. This setup will propel you like a rocket towards \$70,000. If you need real time signals, feel free to DM me or reach out to Prof. Clark's assistant.

I'm telling you, this moment is just around the corner—it might hit while you're asleep. If you already built your position when BTC was at \$58,000, now is the time to take action. You can safely add a smaller position than your original one, leveraging this bull market while keeping risks in check. The beauty of spot trading is its simplicity—you can trade while on vacation, growing your investments as you enjoy life.

Now, let's talk about what happens when BTC hits this buy point—Institute tokens might have already skyrocketed to \$2.50 or \$3.00. Today, it's already broken through the high on the 15min chart. Did you notice? Isn't this the golden breakout buy point? If you don't act now, if you don't add to your position, then when will you?

Last week, I predicted that Institute tokens could deliver a 100% return this month. With the accelerated progress of the AI 4.0 system's internal testing, you'll soon see this potential become reality. The key is to hold enough tokens to maximize your gains. So, don't hesitate—double down and secure your future. This is your moment to get in the game, our moment to crush Mr. W's strategy, and seize an unprecedented wave of profits!

Folks, just yesterday, Prof. Clark used the most conservative formula to calculate the impact of the halving mechanism on BTC's price, predicting that by the end of 2025, BTC will hit \$350,000. To many, this might sound like a fantasy, but I'm here to tell you, for me and many seasoned members, this is old news.

**FB Finance Institute - 15th Session**

This is exactly why I'm so passionate about Bitcoin and why I've achieved such extraordinary results. You should know, my predictions go even further. I recently stated that in this bull market, BTC's target price will be over \$500,000, possibly even reaching \$1,000,000.

But today, I'm not here to repeat my forecasts. I want to share an important insight with you. Investors familiar with ETFs know that ETFs are one of my go to savings tools. Comparing to gold ETFs, the launch of cryptocurrency ETFs will undoubtedly spark a bull market frenzy because history has already given us the answer!

Now, imagine yourself standing on a surfboard, with waves crashing around you, and the perfect wave forming. Just like surfers crave that thrill, we're on the brink of a massive financial wave. Historical patterns and the imminent approval of ETFs are aligning perfectly, setting us up for an unprecedented market surge. Let's ride this colossal wave together and witness the financial spectacle of a lifetime!

FB Finance Institute

The trajectory of Bitcoin spot ETFs mirrors the path gold spot ETFs took back in the day. By looking at the history of gold spot ETFs, we can make some preliminary predictions about the trend before and after Bitcoin ETFs get approved.

### Stage 1: The Anticipatory Surge

Before the Bitcoin spot ETF gets approved, the market is buzzing with electric anticipation. This excitement is like the thrill before a massive wave hits, driving prices significantly higher. Think of

investors as surfers ready to ride the wave.

## **Stage 2: The Approval Sprint**

Around the time the Bitcoin spot ETF gets the green light, the market will experience a sharp and exhilarating surge. Imagine a wave reaching its peak, lifting everything in its path.

## **Stage 3: Post-Launch Pullback and Consolidation**

Shortly after the Bitcoin spot ETF starts trading, prices might peak and then experience a significant drop, followed by a consolidation period. This phase allows the market to catch its breath, absorb more capital, and lay the groundwork for accelerated price growth. Picture a climber reaching a peak, resting briefly, gathering strength, and then aiming for an even higher summit. As investors flood into Bitcoin spot ETFs, these institutions will need to buy equivalent amounts of physical Bitcoin, driving prices up. This is where we are right now.

## **Stage 4: The Long-Term Bull Market**

In the long run, the introduction of Bitcoin spot ETFs will open the

floodgates for traditional capital, becoming a powerful catalyst for a major Bitcoin bull market. Just like how gold prices soared multiple times after the launch of gold spot ETFs, Bitcoin, the digital gold, will trigger a new gold rush!

So, folks, open your eyes and sharpen your minds! We are standing at the historical turning point of the explosive potential of crypto spot ETFs.

Here's the deal: A decade ago, investment funds were pitifully small. Sure, gold ETFs made things easier, but the gold market was already massive, so the impact was limited. Cryptocurrencies, though, are still on their way to mainstream acceptance, but they're skyrocketing in popularity. Crypto spot ETFs will make investing a breeze, attracting a tidal wave of new money and pushing prices higher.

Gold is yesterday's news; its ETF didn't change its essence. Cryptocurrencies are cutting edge technology, brimming with potential and sky high market expectations. The launch of crypto

**FB Finance Institute - 15th Session**

spot ETFs is a game changing catalyst. Add the halving mechanism to the mix, and we're about to witness a flood of capital inflow and wild price swings.

Get this straight: Cryptocurrencies offer more value and wealth creation opportunities in the future than gold ever could. This is your moment. Don't miss out!

Folks, comrades, supporting me means supporting your investment future! Remember my campaign slogan—over the next decade, I'll lead you to financial freedom. Let's dive into the magical world of cryptocurrency! This time, we start your 10x wealth journey with a BTC and Institute token combo spot trading strategy. Stand by my side and fight for greatness!

### **Today's burning questions:**

1. Recently, Mr. Wilson's stock options contracts have achieved extraordinary results, making the low volatility model of spot trading seem feeble. Today's market dip has made single direction trading instruments appear sluggish. If there were a simpler, high

volatility, dual direction contract option for internal testing, do you think it would be an excellent choice?

2. This internal testing plan will be launched for free in the next few days and will be conducted in two phases with limited spots. The goal is a total asset return of 100%. Do you want to be among the first to unlock the new wealth code? If you miss the first round, it means others are already ahead of you. How will you catch up?

---

AI 4.0
