

Dear friends and future investment masters,

It is with immense excitement that I announce that tomorrow (July 15), our Institute will witness a special day—the grand opening of the 15th Internal Sharing Course! Since our Institute's inception, we have navigated through 14 challenging yet glorious years, and this year is bound to be our year of soaring success!

Every individual who steps into the investment market harbors a great dream, and our Ai4.0 system will be the key to realizing those dreams. In 2008, I experienced a turning point in my life. From that moment, I began summarizing my investment philosophies and trading techniques, focusing on quantitative trading. To express my gratitude to my mentor and friends, and to pursue my desire to educate, I founded the Institute in 2011. In 2018, witnessing the immense impact of artificial intelligence on quantitative trading, I committed to developing a revolutionary system—Ai 4.0. This system combines machine learning, neural networks, data sensing, signal decision-making, and AI trading to lead us toward greatness.

FB Finance Institute - 15th Session

As the Ai 4.0 system is about to debut, there is already a wealth of information available online. If you are new here, you can learn about us through our official website, or by searching FB Finance Institute, Wilbur Clark, or AI Financial Genie 4.0 .

The purpose of this early internal training session, compared to the previous 14 sessions, is to accelerate the launch process of the Ai 4.0 investment system application. Before its official release, we need extensive market visibility and test data, making this an exhilarating process! I need the support of each one of you because the data you witness firsthand will surpass 10,000 recommendation letters!

I sincerely hope each of you will spend this precious time with me. I will guide you through its structure and operational principles. Together, we will profit from the investment market, gain valuable practical and test data, and reap substantial returns in this new bull market driven by the upcoming Federal Reserve rate cuts!

For this reason, I have made thorough preparations to ensure

tokens were listed on our strategic partner's cryptocurrency trading center in February 2019. This trading center has obtained the U.S. National Futures Association financial license and the U.S. Financial Crimes Enforcement Network (FinCEN) MSB license. Calculating at the current price of \$2.1, 200 Institute tokens are likely to exceed \$2,000 in value this year.

Benefit 5: Ai4.0 Internal Sharing Learning Incentive Mechanism

1. Learning Incentive Mechanism Overview

To help all members quickly improve during the learning process, to create an atmosphere of 'Healthy Life, Efficient Investment, Learning and Sharing, Joy and Freedom,' to stimulate learning interest, and to cultivate more excellent students, we have formulated this 'Learning Incentive Mechanism.'

Through interactive learning in this session's internal sharing group, you can earn 'Investment-Learning Points.' These points can be used to participate in raffles, exchange for gifts, and gain

Now, let's look at these reward mechanisms and start taking action!
