

## Morning Review

Hi, dear students, good morning!

I'm James Wilson. Today, I will be sharing my insights on the market, providing trading strategies, and helping you navigate through the current market uncertainties to see the guiding light ahead. Today is the last trading day of the week, and the AI4.0 internal test is in full swing. Make sure you actively participate!

First, participate in the internal test to make money. The current market is extremely volatile, and without solid technical skills, it's challenging to seize opportunities in the stock market. AI4.0's trading is incredibly precise!

Second, familiarize yourself with the operations. Simply put, if stocks are profitable, you need to learn how to trade stocks; if options are profitable, you need to learn options trading; if cryptocurrency contracts are profitable, you need to learn how to trade cryptocurrency contracts.

This is a comprehensive strategy that can help us navigate through bull and bear markets and remain undefeated. To highlight its importance, today, in addition to analyzing market trends, I will also provide real time trading signals. This marks the first trade in our 20 consecutive wins series, so stay tuned for my updates! Remember to vote for me, and let's begin today's session!

Let's use historical data as our reference, and learn from the past.

The Nasdaq index started adjusting from 18,671 points, dropping to 17,181 points at a 75° angle, forming a strong bearish A-shape decline. Currently, the short term volatility indicator KDJ is about to enter the oversold zone, indicating an imminent short term rebound. This is a strong signal to hold onto your stocks firmly.

The S&P 500 index also shows a similar A-shaped decline with robust bearish momentum. However, unlike the Nasdaq index, the S&P 500 index formed a classic "shooting star" candlestick pattern yesterday, indicating even stronger bearish forces.

The primary reason for the market decline is investor concerns about major tech companies like \$TSLA and \$GOOG, fearing their relentless and costly investments in AI may not yield returns, potentially creating a tech bubble. Here, I want to instill confidence in you: AI is bound to rise! AI is the market's focal point, and its development will shape the future of technology. Betting on AI is betting on the fate of humanity!

Furthermore, the current investments in AI by big tech companies are nowhere near the levels seen during the last internet bubble. So, my friends, there is no need to worry. Look around, and you'll see our entire institute standing behind you. We are the right companions on this journey!

AI 4.0

As we discuss this, we must mention one person—our very own Professor Clark. You must admire Professor Clark's foresight. It was his precise prediction of AI's importance and his bold

investment in the AI4.0 system that brought a bright future to our institute! This is evident in the valuation growth of our institute tokens.

- Since the official start of the internal test, the institute tokens have appreciated by over 50%.
- Since the AI4.0 internal test promotion began in mid June, the tokens have appreciated by over 200%!

What does this signify? Those who perceive trends early earn the most, reinforcing the statement I've repeatedly mentioned: "True experts earn from their understanding." So far, the four cryptocurrency contract signals in this round of internal testing have achieved over a 70% total asset return! We are on the brink of doubling our total asset returns. And once the AI4.0 internal test succeeds, what level do you think the value of our institute tokens will reach?

So, what is our direction now? What is the most profitable strategy at present?

- GDP Growth: The annualized GDP growth rate for the second quarter in the United States is 2.8%, significantly exceeding the expected 2%. This indicates that the U.S. economy remains robust despite the Federal Reserve's tight monetary policy.
- Treasury Yields: The yield on the 10-year U.S. Treasury note fell by 4 basis points to 4.255%, reflecting increased market confidence in the economic outlook.

Both the second quarter economic growth and personal consumption expenditure (PCE) in the U.S. exceeded expectations, indicating that demand remains stable despite high interest rates. This is a good sign for the Federal Reserve, which is striving for a soft landing for the economy and may cut interest rates as early as September. Therefore, the current investment market is free from black swan events, and technical adjustments have reached a reasonable range. Our investment portfolio is set for a comprehensive takeoff! So, what is the most profitable strategy right now?

For those who haven't voted yet, please cast your valuable vote

**FB Finance Institute - 15th Session**

for me, and let me explain in detail:

We can continue holding our high quality company stocks, as the market is about to rebound. After some volatility, a new primary bull market wave is expected. For those supporting our institute's AI4.0 internal test, I will keep providing stock options trading signals and cryptocurrency contract signals. Together, we will achieve 20 consecutive wins! Currently, I believe the most profitable investment is in cryptocurrencies:

- Bitcoin conference and the bull market are ongoing.
- Mt. Gox and other large holders are decreasing their sell-offs.
- The technical patterns are entering an upward trend.
- Trump and Musk are fully supporting cryptocurrencies.

Recently, presidential candidate Trump stated, "I will make Bitcoin great again." From his speech, we can summarize the following points:

- End the Biden Administration's crackdown on cryptocurrencies.

- Ensure the future of cryptocurrencies and Bitcoin.
- Support for 50 million U.S. crypto holders.
- Prevent central bank interference in cryptocurrencies.

Combining my technical analysis with market news, I conclude that Bitcoin will reach a historic high in August! Therefore, this wave of the bull market must be seized.

Trading cryptocurrencies must involve contracts, as discussed in the last session. Many people have misconceptions about trading, such as fully investing in spot trades to earn 10%-20% profit. This is a complete misunderstanding, as this mindset is about using time to gain space. The correct approach should be to use large funds for contracts to achieve greater returns!

When we have sufficient funds to trade contracts, the advantages are obvious: Suppose you use 10% of your position for each trade, which minimizes risk while utilizing the leverage of contracts to amplify returns. As the total assets increase, maintaining the 10% investment ratio will result in exponential profit growth. You

might not understand, so let me give you an example:

Is a single sheet of paper thin enough? If you fold a piece of paper 27 times, it becomes 13 kilometers thick; fold it 10 more times, and at 37 folds, it surpasses the thickness of Earth! If you fold it 105 times, the entire universe won't be able to contain it! So never underestimate the compound interest effect of contracts! Trading contracts with large funds is the most profitable strategy right now! Next, I will search for the fifth signal in this internal test in real time, which will also be the first trade in our 20 consecutive wins! Everyone, be prepared and closely follow the group messages.

### Ai4.0 Second Internal Test Learning Plan Trading Record

Rules:

1. Initial capital: \$500 testing fund
2. Test cycle: 3-5 days
3. Total assets compound growth rate target: over 80%

Date	Transaction Type	Total Amount Invested	Profit Ratio	Average P&L	Cumulative Return Rate	Total Assets Growth	Total Assets Compound Growth Rate
7/23/2024	—	—	—	—	—	\$500.00	0.00%
7/24/2024	MAL/USDT-100X	\$50	90%	\$45	90%	\$545.00	9.00%
	MAL/USDT-100X	\$60	150%	\$90	240%	\$635.00	27.00%
7/25/2024	MAL/USDT-100X	\$70	170%	\$119	410%	\$754.00	50.80%
	MAL/USDT-100X	\$80	130%	\$104	540%	\$858.00	71.60%
7/26/2024	MAL/USDT-100X	\$90	80%	\$72	620%	\$930.00	86.00%

Congratulations to all who followed the trades! We achieved over an 86% total return on assets through 5 crypto contract signals! From the second internal test on Wednesday to now, in just three days, we've accomplished what many stock traders can't achieve in two years! Are you satisfied with these returns?

This afternoon, Professor Clark will summarize this week's institute activities. What surprises will he bring? Please tune in to Professor Clark's course at 3:30 PM ET!

---

### **Closing Commentary**

I am thrilled to announce that with the successful completion of our final trade today, our internal testing plan has achieved complete success!

Our original goal was to achieve an 80% to 300% total return on assets within 3-5 days. Through 5 precise trades, each using around 10% of the position size, we leveraged the highest

**FB Finance Institute - 15th Session**

volatility exchange native token 100X contracts, achieving returns of 90%, 150%, 170%, 130%, and 80%, cumulatively reaching 620%.

The initial test capital of \$500 has grown to over \$930, yielding a total asset return rate of more than 86%!

This performance is the best reward for our efforts, and at this moment, I can't hide my joy! This is undoubtedly a great victory!

I deeply feel everyone's enthusiasm and expectations. Your goals and ideas are the foundation of our institute's future development. For 14 years, our institute has grown from scratch to now holding a significant place in the investment market, all because we have always adhered to the core philosophy of "focusing on the interests of our students."

After today's session, I will send out a survey, and I sincerely invite every friend to participate. Together, we will decide on our next "Ai4.0 Investment Planning"! Your feedback will provide valuable guidance for our future development, and together, we will aim for even higher goals.

What major tasks do we have ahead? What important benefits

**FB Finance Institute - 15th Session**

will I share? What significant opportunities and insights does the announcement of PCE data bring? These are the key topics I will discuss next.

Today, we are not just celebrating past achievements; we are preparing for future challenges and opportunities. Let's move forward together! Every one of you who persists in your dreams has the chance to become the next investment master. Believe in yourself, believe in our team, and the future will belong to each of us!

The June PCE report brought encouraging news: the Federal Reserve's tightening policy has managed to reduce inflation without causing significant damage to economic growth. The data shows sufficient progress in inflation and employment markets, opening the door for a rate cut in September.

After the data was released, investor sentiment improved significantly. The VIX fear index decreased, the yield on the 10-year Treasury note fell, and stock indices, gold, and cryptocurrencies all rose. Yesterday, I encouraged everyone to overcome panic and emphasize the importance of optimizing investment portfolios. Market fluctuations are inevitable, but with wisdom and confidence, we can overcome these challenges!

Friends, the best investment opportunity for the end of the year has arrived, especially in the cryptocurrency market. BTC, as "digital gold," possesses scarcity and anti-inflation characteristics. It is not dependent on any country's economic conditions, making it a hedge against currency devaluation and a protector of purchasing power. Its decentralization and blockchain technology

not only enhance the diversity and security of the financial system but also promote economic innovation and growth. BTC is traded and priced in USD, which increases global demand for the dollar, strengthening its international status and making BTC a new generation of strategic reserve assets.

As "Shark" mentioned, BTC is currently in a "banana" bullish pattern, and with the Bitcoin conference approaching, the \$100,000 target is within reach. Our spot trading strategy has repeatedly captured good entry points, bringing substantial profits.

Therefore, the cryptocurrency market and its associated opportunities are the areas we must focus on and delve into. The current market environment provides us with unprecedented opportunities, and it is the time for us to demonstrate our wisdom and courage!

**I believe that the Institute's token is something each of you should own, as it is the best benefit for this term's students and**

**FB Finance Institute - 15th Session**

**those supporting our testing efforts! Let me explain the reasons succinctly:**

**Technological Innovation:**

The creation of the Ai4.0 investment system marks a significant breakthrough in investor education. This system offers personalized investment advice, meeting the market's demand for intelligent services.

**Market Potential:**

The Ai4.0 investment system not only enhances investors' returns but also innovates the traditional course subscription model. Our advanced technology strengthens our business model and profitability, driving the development of the entire investment education industry and opening up vast opportunities for the Institute.

**Brand Influence:**

With the successful testing and planned launch of the Ai4.0 investment system, the Institute's brand awareness and market

**FB Finance Institute - 15th Session**

share will increase significantly. This will attract more investors' attention and lay the foundation for long term growth.

#### Investment Value:

As the incubator and funding source for the Ai4.0 investment system, the Institute's token shows strong price growth. With the progress of testing and increased attention, its potential to double in the short term is immense. Investing in the Institute's token now promises significant returns in the near future.

At this stage, investing in the Institute's token is not only a recognition of its technological innovation and market prospects but also an excellent choice to capture the potential growth opportunities in the cryptocurrency market. With the smooth implementation of the Ai4.0 system testing plan, the Institute's token has risen from \$1.1 to \$3.5, an increase of over 200%. Amid stock market volatility, the Institute's token's stable investment value will become even more apparent!

Trust me, for those who believe in the Ai4.0 system testing plan and future development, now is the time to invest. I am setting

**FB Finance Institute - 15th Session**

the medium to short term target price of the Institute's token at over 7 USDT!

The soaring price of the Institute's token is closely tied to the successful implementation of our internal testing plan, and none of this would have been possible without everyone's concerted efforts.

To express my gratitude for your unwavering support, each participant will receive a classic book, handpicked by me and hailed as the Bible for investors, along with three months of free access to the Ai4.0 investment system personal edition (valued at \$12,500). Additionally, this week, you will have a chance to win a reward worth \$5,000 in our special draw!

All those who fully participated in the internal testing will also get early access to the "Ai4.0 Trial Edition" before Christmas. This experience version will provide free access to the widely used "Trading Signal Decision System" until the personal edition officially launches, allowing you to enjoy this revolutionary

**FB Finance Institute - 15th Session**

investment tool ahead of its official release.

At this moment, I want to celebrate your teamwork, bravery, and relentless pursuit of progress! Although the Ai4.0 system is not yet perfect, it is through our collective efforts and continuous exploration of its shortcomings that it is becoming a tool that truly serves everyone. Thank you for being part of this loving community and for your team spirit. Let us continue to work together to make Ai4.0 even better!

Dear friends, at the start of our first internal testing phase, I boldly declared that even a single loss would signify the failure of the testing plan. This reflects my deep confidence in the Ai4.0 system's precise ability to seize market opportunities. While the path to pursuing our dreams may not always be smooth, we are unafraid of failure and even more eager for success!

The Ai4.0 system is the result of nearly six years of relentless efforts by a dedicated team of engineers and practical experts. From version 1.0 to the current 4.0, it has continuously evolved from my foundational quantitative trading system, with each leap

**FB Finance Institute - 15th Session**

forward embodying the sweat and wisdom of the team. Its strength lies not only in interpreting the past but also in predicting the future—that's the secret behind our high success rate!

If all goes well, you will witness the glorious launch of Ai4.0 after Christmas. All of this is thanks to our team's indomitable spirit and pioneering courage. Here, I extend my heartfelt gratitude to my team for their immense dedication to this goal!

We will continue to optimize the system's performance. Ai4.0 is more than just a system; it is the universal key to unlocking investment success. Together, let us embrace our promising future!

At the same time, I want to express my gratitude to our sponsor, MALCOIN Trading Center, for providing over 10,000 accounts and more than \$5 million in test funds. This exceptional trading center holds financial licenses from the National Futures Association (NFA), membership with the UK Foundation, and an MSB financial license from the Financial Crimes Enforcement Network (FinCEN).

**FB Finance Institute - 15th Session**

You can find this information in the 'Academy' section on their application homepage.

Their AI trading center has a deep partnership with us, and those interested in cryptocurrency investments should pay close attention to their offerings. In the future, we will have more in-depth and significant collaborations, such as the Future Fund, which I will share more about when the time comes.

**Now, regarding the arrangement of test funds and earnings:**

Firstly, for those partners who have completed this round of internal testing with us, it's time to return the \$500 test funds to MALCOIN Trading Center. After today's session, my assistant will provide their contact information to ensure that you can make the most of this excellent resource in your future investment journey. Alternatively, a more convenient way is to complete the return with the help of my assistant.

As for the earnings, you have the freedom to either withdraw

them to your personal crypto wallet or reinvest in Institute tokens. Remember, the investment opportunity in Institute tokens has just begun!

**My personal suggestion is to divide the earnings into three parts:**

1. Withdraw a portion: Reward yourself for your hard work.
2. Reinvest in Institute tokens: This supports our Institute and also invests in your own belief.
3. Charity: Regardless of the amount, this is a wonderful way to give back to society.

AI 4.0

# 5 Token Economic Model

## 5.1 Token Allocation

At FFI, we integrate artificial intelligence technology into the fields of education and finance, creating revolutionary investment tools. The token, named FFI, has a total supply of one billion. The distribution plan is as follows:

**IDO (Initial DEX Offering): 15%, initially raised through decentralized exchanges.**

**Scientific Research: 20%**, in support for continuous technology development and innovation.

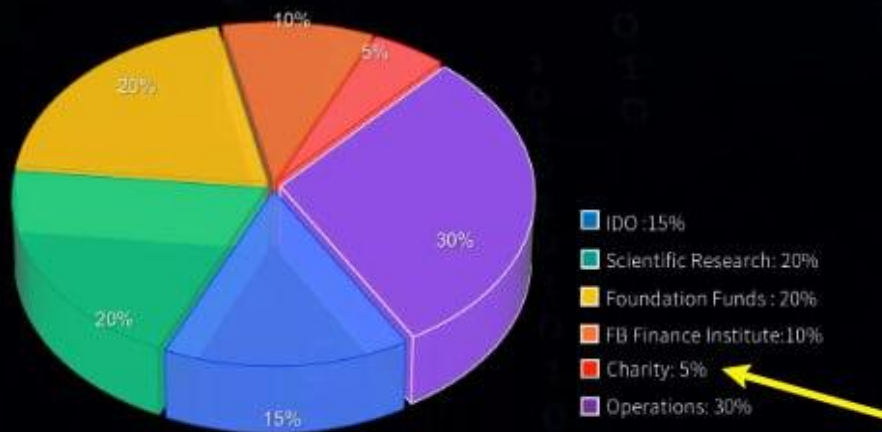

**Foundation (Including Shareholder Dividend): 20%**, to protect the long-term operation of the project and the interests of shareholders.

**FB Finance Institute: 10%**, used for education and research development.

**Charity: 5%**, and supports various social and environmental projects.

**Operations: 30%**, used for daily operations and marketing.

The token allocation is as shown below:

Investment is not just about wealth growth; it is a journey of self-redemption. At our Institute, we deeply believe in the power of charity. This core value is vividly reflected in the equity structure of the Institute's token white paper, which we have always upheld in practice!

In 2008, my life was profoundly transformed by the inspiration of my mentor. At that moment, I vowed to use my power to change the world. Therefore, I founded the Institute, dedicated to bringing well being and hope to investors and students through education and the Ai4.0 Investment Advisor System.

Our government distributed significant relief funds during COVID-19, helping countless citizens and gaining more support. Elon Musk's products benefit humanity, making him a celebrated CEO. These examples prove one thing: true power lies in the ability to bring hope and change to others.

I firmly believe that with the continuous upgrade and improvement of the Ai4.0 system, it will become a star product

**FB Finance Institute - 15th Session**

helping ordinary investors achieve self-redemption and open the door to a new investment world. Everyone who joins us will witness and benefit from this historic moment.

The screenshot shows the Save the Children website. At the top left is the Save the Children logo. To its right is a search bar with the placeholder text 'Enter search term'. Below the logo are navigation links: 'Who We Are >', 'What We Do >', 'Ways to Help >', 'Browse Gift Catalog >', and 'Monthly Support >'. A breadcrumb trail below the navigation reads: 'Home > Ways to Help > Ways to Give > Other Ways To Give > Donate Bitcoin and other Cryptocurrencies'. The main content area features a large graphic of a child's hands holding a flag with Bitcoin and Ethereum symbols, standing on a base of various cryptocurrency icons. Below the graphic are the hashtags '#DonateCrypto, #HODLHOPE' and a red button that says 'DONATE CRYPTO NOW'. To the right of the graphic is the article title 'Why Donate Bitcoin, Ethereum, NFTs and other Cryptocurrencies to Charity'. The article text states: 'For over 100 years Save the Children's mission has been based on the simple principle that all children have the right to be healthy, educated and protected. Among those are children living in dangerous conflict zones such as Gaza and fleeing violence in places like Ukraine. Save the Children also provides relief to families fighting the double impacts of a worsening global hunger crisis and climate shocks in places like Somalia and Afghanistan. Your cryptocurrency donations support our mission to keep children healthy, educated, and safe every day and in times of crisis. Our Children's Emergency Fund focuses on those who need your help most. If you would like to support a specific country or humanitarian response for the holidays, please include this in the "Donation notes" field and we will do our best to honor your wishes.'

In the journey of investment, love is our compass. Love the world, love everyone around you—this is not only the beginning of self-redemption but also an art of living. Ai4.0 carries our mission—to guide everyone towards self-redemption, infuse warmth into society, and bring happiness to countless families.

The power of love is boundless. Those who are generous and

willing to contribute to peace and goodness will navigate the investment seas with success, achieving profound life transformations.

At our Institute, charity is not just a tradition; it is part of our spirit. This time, we have chosen to partner with "Save the Children." Through cryptocurrency, whether anonymously or not, we can all contribute to making the world a better place. Remember, giving to Save the Children is one of the world's best investments. Every donation lights up a child's hope and warms their future.

After today's session, my assistant will provide the charity link. Let us use the power of investment and our hearts to light up the world, bringing warmth and hope to more children.

Investment is not only about wealth growth but also about the elevation of the soul. When we stand together, creating wealth with love and wisdom, we infuse the world with more warmth, kindness, and hope.

I believe this is the true spirit that Ai4.0 should embody!

Do you, like me, deeply agree with these views? If you have already participated in this charitable action, please send the donation screenshot to my assistant. I guarantee that there will be a special reward for your kindness.

Although our donations may seem small, remember that every good deed, no matter the size, is a commitment to a better world. This is not just an expression of confidence in the market, but also a promise to yourself: we have the ability and confidence to earn more profits. Through investment, we can improve our own lives and bring more beauty to the world.

Every act of kindness demonstrates our respect for investment and our deep appreciation for the Ai4.0 system. Ai4.0 provides us not only with the ability to profit but also with unprecedented strength and confidence. It is this strength and confidence that enables each of us to reach new heights in our investment careers, making investment not just a means of accumulating wealth, but

**FB Finance Institute - 15th Session**

also an enjoyable and fulfilling process.

Dear friends, family, and esteemed future investment masters, with each successful test, do you feel, like me, a surge of boundless enthusiasm and passion for the future? We are standing at a new starting point, ready to embrace an era filled with opportunities and challenges!

Let's join hands and build a great community full of joy and freedom, showcasing our limitless strength to the world. Our dream is to establish Ai4.0 as a shining beacon in the industry, guiding every seeker forward!

### **How do we reach this magnificent future?**

#### **1. Customized Learning**

We will spare no effort to unveil the magical structure of Ai4.0, guiding each of you to find your place in the vast ocean of knowledge. Learning is our first step, the bridge to our success!

## 2. Comprehensive Investment

With the successful internal testing of Ai4.0, we confidently step into broader investment realms. Our goal is to ensure that every supporter achieves returns sufficient to purchase the Ai4.0 institutional edition (\$1,000,000/year) before its official launch.

## 3. Rapid Launch

We will expedite the launch of the Ai4.0 system application, making it a blessing for many more people.

Learning is the universal key to unlocking wisdom!

In this turbulent and uncertain market, Ai4.0 reveals unprecedented opportunities to us, showcasing the powerful force of technology and the importance of deep learning. It opens the doors to success, allowing us to share in the abundant investment returns together.

Mastering scientific investment methods and tools is our key to victory. Let's learn together, grow together, and utilize the power of technology to write legendary chapters in our lives!

**FB Finance Institute - 15th Session**

At this momentous occasion, I am filled with boundless confidence and eager anticipation for the future. I firmly believe that with the power of Ai4.0, each of us can stand at the pinnacle of our lives, ready to embrace the brilliance that awaits us.

Today, I share my heartfelt thoughts with you, hoping to inspire us all to take action together. Shortly, my assistant will share the charity donation link, our contact information, and the business cards of our top of the line offline customer service representatives at the trading center.

As we successfully conclude our Ai4.0 internal testing and investment learning program, we are stepping into a new milestone. To make our future courses more vivid, practical, and tailored to meet the needs of every member, I sincerely invite you to participate in a new journey—our satisfaction survey. This is not only a reflection on the past but also a planning for the future.

## **Your feedback is crucial in driving future changes:**

1. How satisfied are you with the results of the Ai4.0 system combined with crypto contract testing? Do you have any suggestions for improvement?
2. Based on our recommendations, how have your recent earnings in the stock and cryptocurrency markets been?
3. Considering your recent investment results and learning experiences, please share your views on the importance of learning investment knowledge and indicate which investment and learning areas you are more interested in.
4. What are your thoughts on year-end investment planning? What goals do you want to achieve? How can we assist you?

Every step forward relies on your insightful perspectives and valuable opinions. Please private message us and let the change begin now! Have a wonderful weekend!
