

Dear friends, family, and esteemed future investment masters,
good evening!

Whenever I engage with you, my heart is always filled with excitement and anticipation. Being an indispensable mentor in your investment journey makes me feel immensely proud and honored. While many are already asleep, I have just finished reading your survey responses and letters regarding our recent internal testing plan. My heart is stirred, reminiscent of my own student days. I am eager to share these feelings with you!

I hope this letter resonates with the most active and growth-seeking part of your soul. I write to share some recent observations, feelings, reflections, decisions, and an upcoming new challenge.

First, let's talk about our recent internal test. With strong support from our strategic partners, this test was meant to be a valuable opportunity for learning, practice, and mutual growth. However, I noticed that a very small number of friends did not strictly follow

FB Finance Institute - 15th Session

the instructions, leading to losses. Ultimately, only 96.3% of the principal was returned, as some test accounts ended up in the red. This has deeply shocked me!

This is not only a disregard for the funds but also a significant misstep in personal investment philosophy. In the world of investments, every decision is serious and crucial; every operation directly affects our future. Poor investment habits are like a slow poison, with consequences that should not be underestimated.

Through your feedback on the questionnaire, my heart is filled with both pride and joy. Your enthusiasm, particularly your keen interest in the cryptocurrency market and your high expectations for the Institute's tokens and contract trading, have far exceeded my expectations. Your feedback is not only a recognition of our work but also a motivation for us to grow together and explore the future.

Here, I want to share some exciting results from the recent beta test survey and the profound reflections it has triggered. Your

FB Finance Institute - 15th Session

feedback has greatly encouraged and inspired me, reminding me of the challenges and opportunities we face.

First, let me briefly summarize the main conclusions of the survey:

1. Everyone is very satisfied with the returns from the internal test plan and has expressed a desire for more investment methods.
2. In the combination of stocks and cryptocurrencies, cryptocurrencies have shown higher short term return potential, sparking a strong pursuit for better profit growth points.
3. There is widespread emphasis on continuous learning, especially in investment knowledge and profit strategies in the cryptocurrency market. Everyone is eager for more sharing and in-depth understanding.
4. Many friends have already set higher return goals and dreams for themselves, which is admirable for their proactive attitude.

Faced with such strong desires and expectations, we must seriously consider our future planning. At the same time, we are

also facing stock market volatility caused by policy uncertainties, which inevitably increases the complexity of operations and the difficulty of making profits.

Frankly, I have never worried about our performance in this area, as investment is our strong suit. However, I do have some concerns that too much distraction might affect my ability to focus on other important matters.

Lately, I have been extremely busy, even sacrificing precious time with my family, for which I deeply apologize and feel uneasy. Yet, seeing your thirst for knowledge, high standards for yourselves, passion for investment, and determination to change your family's lives and futures through investment, I am deeply moved. To be honest, I feel like I am at a crossroads now!

Right now, only whiskey and cigars can help me ease my inner conflicts. Cryptocurrency contracts were originally just one direction for our beta testing, chosen for their high volatility and high success rate strategies. If this test is successful, we will

continue to tackle the challenges of the current stock market, as the stock market has always been our main battlefield. This was my original plan!

Yet, behind every challenge lies endless opportunities. The current cryptocurrency market is experiencing a series of favorable conditions:

- The anticipation of interest rate cuts is driving a bullish sentiment in the market, particularly in the cryptocurrency field, showing a strong outlook.
- The Bitcoin halving cycle started in April this year, with predictions suggesting that BTC's price could reach \$350,000 during this bull market, presenting a rare investment period.
- The introduction of Bitcoin and Ethereum spot ETFs further facilitates institutional capital inflows, accelerating market maturity and development.
- Historical data indicate that election years generally benefit the cryptocurrency market, and this year's election is no exception, further boosting market attention and investor confidence.

AI4.0 - FUTURE LEADERS

200% PROFIT CHALLENGE PLAN!

- 1** Achieve an 200% Return on Total Assets in Just 7 Days!
- 2** Follow the Rules Strictly, and We Cover Any Losses!
- 3** Customized Investment Plans to Help You Quickly Become an Investment Leader!

FB Finance Institute - 15th Session

These factors collectively showcase the advantages and potential of the cryptocurrency market at this moment, providing us with rare investment opportunities. Seizing this popular investment cycle will make it easier to achieve our financial goals!

Nearly 70% of our friends have strongly requested through private messages that we continue to leverage the Ai4.0 system in combination with cryptocurrency contracts to achieve even greater results. This is the core dilemma that has been weighing on my mind.

Whenever I face difficulties, I reflect on my life experiences, contemplating how to not only survive but thrive in this rapidly changing world. I recall how I emerged from the depths of the investment valley in 2008, the grand vision I had when establishing the Institute, and the words, investment philosophies, and values I shared with everyone during bear markets and downturns. These memories play like a fast forwarded movie in my mind, and ultimately, I found the answer!

These experiences constantly remind me that our mission goes beyond just this. Ai4.0 is not merely a tool; it carries the mission of injecting more warmth, kindness, and hope into the world, simplifying investments, and enhancing the quality of life for countless families.

After careful consideration, I have decided to meet the demands of the majority of our friends and formulate a challenging yet highly achievable investment plan: to achieve a 200% total asset return within one week!

I have named this plan the "Ai4.0 Future Leaders 200% Profit Challenge Plan!" This plan is not just a challenge but a symbol of our collective growth and success.

This plan includes the following components:

1. Profit goals, duration, and significance.
2. Minimum entry requirements and reasons.
3. Recommendations related to funding.
4. Rapid growth strategies.

5. My expectations and exclusive customizations.

Total Assets Growth	Total Assets Compound Growth Rate
\$500.00	0.00%
\$550.00	10.00%
\$586.00	17.20%
\$634.00	26.80%
\$674.00	34.80%
\$749.00	49.80%
\$797.00	59.40%
\$877.00	75.40%
\$947.00	89.40%
\$1,157.00	131.40%
Total Assets Growth	Total Assets Compound Growth Rate
\$500.00	0.00%
\$545.00	9.00%
\$635.00	27.00%
\$754.00	50.80%
\$858.00	71.60%
\$930.00	86.00%

Firstly, let me elaborate on the first point: we plan to lead everyone in achieving a 200% total asset return goal within 7 days! In our previous two successful internal tests, we achieved total asset returns of +131% and +86%, respectively, in just 3 days. Therefore, with the upcoming favorable market conditions and more ample time, I am very confident that we can achieve this goal. I believe that those who have seriously experienced the internal tests have this confidence!

Next, let me delve into the extraordinary significance of the "Future Leaders" initiative in six key points:

1. Aspiring to Lead the Future of Investor Education

Our institute aims to be a leader in the field of investor education, dedicated to providing the most advanced investment concepts and practical experience. Our goal is to cultivate outstanding investors with strategic vision and practical capabilities, setting a new benchmark for the entire industry.

2. Ai4.0 System: the Future Leader

The Ai4.0 system represents the future of investment advisory decision-making. It will fundamentally change the existing decision-making models, making investments more intelligent and efficient. We firmly believe that the Ai4.0 system will become a leader in future investments, helping investors achieve greater success in the market.

3. Cryptocurrency Contracts: The Leaders of Investment Instruments

The cryptocurrency market is currently one of the hottest markets. By combining numerous market instruments with the Ai4.0 investment system, cryptocurrency contracts have an exceptionally high success rate. Therefore, cryptocurrency contracts are undoubtedly the leaders among all investment instruments, offering investors more opportunities and returns.

4. Positive Impact of "Future Leaders" on the Cryptocurrency Market

The election has a very positive impact on the cryptocurrency

market. Regardless of who ultimately becomes the new leader, they will actively promote the positive trajectory of the cryptocurrency market. This provides new opportunities for our investment strategies, helping us achieve greater success in the market.

5. 16th Chief Practical Instructor Selection: Leading the Future of Investment Education

The institute is conducting the selection of the 16th Chief Practical Instructor, who will lead the future of investment education at the institute for many years. This is not only an important test for the instructor but also a significant push for the future development of the institute.

6. The Investor's Path to Becoming a "Leader"

Through the best market conditions, systematic courses taught by three practical instructor, practical cryptocurrency education, and the assistance of the Ai4.0 system, investors will gradually forge their path to success, becoming leaders among investors. Every investor can find their own "leadership path" in this process,

FB Finance Institute - 15th Session

achieving personal breakthroughs and growth.

To address all objective concerns, I have set a minimum entry requirement of \$5000. This means that some friends may not be able to participate. Why have I set this requirement?

1. The minimum entry requirement ensures that while we aim for the profit plan, it does not consume too much of my energy. From internal training, preparing for the Ai4.0 system launch, to directly participating in investment practice, these are crucial tasks I cannot overlook.

2. Setting a higher minimum entry requirement attracts participants who are more focused on the process. These friends are more likely to concentrate on the goals, resulting in more genuine and satisfactory investment outcomes. This also helps prevent behavior and data discrepancies that occurred due to lack of seriousness towards the \$500 test funds.

3. I hope more people can afford the Ai4.0 institutional edition(annual subscription fee of \$1 million). With equal opportunities, larger investment accounts are more likely to achieve such goals.

4. A higher investment amount means greater responsibility. When you invest more funds, we will respond with greater responsibility, ensuring that every investment brings satisfactory returns. This confidence and responsibility might bring unexpected surprises.

5. A certain level of funds can significantly enhance the management efficiency of the plan. Compared to smaller accounts, investment accounts with \$5000 or more can more effectively implement strategies, thereby improving trading efficiency and profit expectations. The larger the funds, the more obvious the advantages. This increase in selectivity and profit potential is highly beneficial for achieving the 200% total asset return target.

Next, let's discuss some essential recommendations related to funds. Please absorb and implement these suggestions carefully.

1. Utilize Profits for Participation

Using the profits from your recent investment portfolio to participate in this plan will make it feel much easier. Despite the recent stock market volatility, our strategies and position management have ensured stable returns from stocks, stock options, and cryptocurrencies. Using your profits to participate can reduce pressure since it's about putting your extra earnings to work for you!

2. Fund Allocation and Confidence Building

Initially, consider using a small portion of your stock portfolio (like 20%) to participate in the plan and gradually build market confidence. As you gain more understanding and confidence, you can gradually increase your investment amount to seek greater returns. If you plan to increase your investment amount or have been significantly affected by recent stock index fluctuations, we are always here to provide support and planning advice.

3. Asset Allocation and Learning

Cryptocurrencies should be a part of your investment portfolio, not just to follow mainstream investment trends but to add flexibility and potential to your investment path. After each trade, I will share more tutorials and methods related to the Ai4.0 upgrade application, which many friends have long anticipated.

4. Sell Off Non-Hot Stocks

If your portfolio still holds losing or non-hot stocks, now is the time to adjust. These stocks might be wasting your time and money. Transferring these funds into our profit plan can not only recover losses but also bring more substantial returns. Don't hesitate, act immediately, and contact us to resolve the issue together.

5. Quick Ways to Acquire USDT

For friends unfamiliar with the cryptocurrency market and need to purchase USDT via bank transfer, I recommend scheduling an appointment with the relevant staff at the trading center through my assistant. The cryptocurrency market operates 24/7, including

weekends, ensuring you can quickly get involved. Next Monday, I will share more about the funds' circulation and investment knowledge in the cryptocurrency market.

Then, let's discuss how to achieve rapid growth.

1. Investment Attitude:

We will be using our own funds for investment. This is not just a transaction; it is a career. Viewing investment as a career is crucial as it forms the foundation for sustained success.

2. Execution and Responsibility:

Resolutely executing trading strategies and signals is our guarantee of success. Strictly adhering to rules ensures reliable results. I cannot be responsible for actions that do not follow the rules; however, if you follow the rules and still encounter losses, I will take full responsibility!

3. Emotional Management:

In trading, it is crucial to avoid arrogance and impulsiveness.

Maintaining humility, openness, and emotional stability is key to becoming an investment expert like the "Shark" and the "Wizard."

4. Continuous Learning and Participation in Evaluation Activities: After each trade, we will thoroughly analyze the course highlights. This not only helps you grow quickly but also is crucial for our collective progress. The market itself is the best teacher, and learning from successful individuals is a shortcut to success. "Options Wizard" and "Crypto Shark," as the top candidates in the next Chief Practical Instructor selection, have demonstrated exceptional investment skills and market insights.

To objectively determine the interim results, we will use contract trading as the evaluation tool. This will fully showcase their market understanding, investment system completeness, strategy effectiveness, and sense of responsibility.

In particular, in crypto contract trading, "Crypto Shark" is renowned for his unique α & β trading system, having turned \$3.7 million into \$152 million in just a few years. Meanwhile, "Options

Wizard" is ready to challenge a 20 win streak in contract trading, demonstrating his outstanding strategy and execution. As he puts it: this will be a dimensional reduction strike!

Choosing the next Chief Practical Instructor not only impacts individual investment development but also determines our Institute's future investment education path.

We invite you to invest your time, evaluate them through practical and theoretical teaching, and your votes will provide significant input for selecting our future leaders.

While fulfilling your personal investment preferences, we also hope you actively participate in this evaluation activity, contributing to the prosperity of our shared community!

Lastly My Expectations and Personalized Recommendations

1. My Expectations

1.1 Investing in Institute Tokens After Profiting

Every successful investment is not only a personal wealth growth

opportunity but also a chance for our community to prosper together. I sincerely encourage you to reinvest a portion of your profits into Institute tokens. This will not only enhance our community's strength and influence but also directly increase the value of Institute tokens, allowing every community member to share in our collective success. Let's grow together and create more opportunities for shared value!

1.2 Recommending New Supporters

Your success is crucial not only for your own growth but also for the long term development of our Institute and the Ai4.0 system. Once you achieve your investment goals, please actively recommend at least five new partners to join our ranks. This will help lay a solid foundation for the future launch of Ai4.0 and expand our influence. Every recommendation you make is a significant contribution to our future development. Let's work together for the prosperity of our Institute and community!

2. Personalized Customization: Crafting Your Profit Blueprint

We understand that every investor has unique backgrounds and goals. Therefore, we offer fully personalized investment plans designed to help you achieve at least 200% asset growth within a specified time frame. For instance, if your goal is to earn \$1,000,000, we might only require an initial investment of \$500,000.

For those who have busy schedules and cannot monitor the market continuously, we recommend adopting a strategy of 'primarily mid term trading with supplementary short term trades.' This way, you can leverage the advantage of larger capital to find stable trading opportunities in longer cycles. Even with fewer trades, you can safely and effectively reach or exceed your expected profit targets while minimizing risks.

Share your investment goals with us, and we will start you on a journey tailored for success. Based on your financial status, interests, risk tolerance, investment horizon, and profit targets,

FB Finance Institute - 15th Session

we will meticulously design a streamlined and efficient investment plan. Our aim is to ensure your investment journey is both profitable and confident through personalized strategies and dedicated guidance.

Reveal your vision to us, and let our expertise, experience, and the Ai4.0 system be the strong support behind your investment success. Time is precious, so act now! When you finish reading this letter and reply to me, I will ensure you can quickly join this plan!

Dear Friends, I have a strong premonition that our upcoming plan will give rise to the future financial giants of Wall Street! As we embark on the journey of the "Ai4.0 - Future Leaders - 200% Profit Challenge Plan," this is not just an investment opportunity; it is a journey of growth and realizing dreams together. This moment is about showing your determination and readiness, a beginning where we write our success stories together!

We are not just aiming for short term profits; through this process,

FB Finance Institute - 15th Session

we want to develop more professional, calm, and visionary investors. Every friend who joins our plan is a valuable partner, and we look forward to growing together and witnessing every step of success.

If you have any questions about the upcoming challenge or need further guidance and support, please do not hesitate to contact us.

We hope that by next Monday, every participant will be fully prepared to face this challenge in the testing state. More importantly, please closely follow the important course on Monday morning. I will delve into the core content and strategies of the plan, helping you better understand and prepare for this challenge. This is a valuable learning opportunity and crucial for us to achieve our goals together.

Remember: success is not accidental but the result of meticulous planning and decisive execution. Therefore, let us move forward hand in hand, achieving our dreams together!

FB Finance Institute - 15th Session

At this exciting moment, let us stride towards the path of success with unwavering determination and never give up.

Now, it's time to act. Together, let's take this step with anticipation for the future and a desire for success. Get ready to accept the challenge, and get ready to meet a better version of yourself.

A prosperous future is written by us together! The future is here, act now! We await you in the "Ai4.0 - Future Leaders - 200% Profit Challenge Plan" to create brilliance together!

Best Regards,

Wilbur Clark
