

## Morning Review

<b>Ai4.0 - Future Leaders - 200% Profit Challenge Plan</b>							
Achieve an 200% Return on Total Assets in Just 7 Days! Follow the Rules Strictly, and We Cover Any Losses! Customized Investment Plans to Help You Quickly Become an Investment Leader!							
Date	Transaction Type	Total Amount Invested	Profit Ratio	Average P&L	Cumulative Return Rate	Total Assets Growth	Total Assets Compound Growth Rate
7/28/2024	—	—	—	—	—	\$5,000.00	0.00%
7/29/2024	Platform's native token - 100X	\$500	110%	\$550	100%	\$5,550.00	11.00%
	Platform's native token - 100X	\$500	130%	\$650	230%	\$6,200.00	24.00%

Good morning, dear friends, family, and esteemed future investment masters!

Yesterday, our "Ai4.0 - Future Leaders - 200% Profit Challenge Plan" started off with great momentum, achieving two victories on the first day with an impressive total asset return of approximately 24%! This is an exciting start, showcasing our solid strength and the successful application of our strategies.

The Options Wizard made his debut with a simplified version of contract trading techniques, mastering the operation patterns of

**FB Finance Institute - 15th Session**

candlestick charts. He presented complex price fluctuations using impressively simplified tools, demonstrating his true prowess through actual profits. I hold him in high regard.

As market panic spreads, major global investment markets are facing declines. Many sensible friends have written to me, expressing gratitude and praise for initiating the "Ai4.0 - Future Leaders - 200% Profit Challenge Plan." This recognition brings me immense satisfaction.

I understand that your presence here is not solely for profit but also for learning and growth. Our mission is to ensure you surpass your past successes, continuously enhancing your investment skills and insights, standing at the forefront of the market, and seizing every valuable investment opportunity.

With the robust support of the Ai4.0 system, we are confident in overcoming any challenge. This is undoubtedly our era!

Today, what kind of returns can we anticipate? Amidst market

**FB Finance Institute - 15th Session**

turbulence, super opportunities are quietly brewing. Are you ready to embrace the latest advanced Ai4.0 courses? Let's begin this beautiful day with joy and anticipation.

I'm closely monitoring the dynamic data from Ai4.0 to ensure that I can promptly relay the latest trading signals to everyone. In this

**FB Finance Institute - 15th Session**

time filled with challenges and opportunities, let's stay vigilant and well prepared.

The weekly chart for the US dollar shows that a mid term buying point may soon form. As the world's primary safe haven asset, the dollar tends to be favored when market sentiment is unstable or when investors are risk sensitive. This could negatively impact stock indices, suggesting that market volatility might persist. Therefore, we need to be patient and closely follow our profit plan.

Recently, we've discussed various topics, including earnings reports, stock market fluctuations, the Middle East situation, and gold. However, the most attention grabbing topic remains cryptocurrencies.

Many people have expressed to me that the brokers who once helped them achieve stable profits are now finding it more difficult to provide financial support. Does this mean their investment capabilities are declining? I believe there might be deeper issues at play.

Let's delve into these concerns. Regardless of your level of interest in these issues, they are happening and impacting our lives and financial situations. Let's embark on today's learning journey together, exploring and addressing these market changes!

Rank	Name	Symbol	Market Cap	Price	24h	7d	Price (30 days)
1	Gold	GOLD	\$16.333 T	\$2,432	0.28%	0.94%	
2	Apple	AAPL	\$3.346 T	\$218.24	0.13%	-3.01%	
3	Microsoft	MSFT	\$3.171 T	\$426.73	0.34%	-4.07%	
4	NVIDIA	NVDA	\$2.744 T	\$111.59	-1.30%	-8.97%	
5	Alphabet (Google)	GOOG	\$2.095 T	\$171.13	1.45%	-6.79%	
6	Amazon	AMZN	\$1.906 T	\$183.2	0.38%	-1.72%	
7	Saudi Aramco	2222.SR	\$1.784 T	\$7.38	-0.90%	-1.60%	
8	Silver	SILVER	\$1.576 T	\$28.01	0.50%	-4.70%	
9	Bitcoin	BTC	\$1.317 T	\$66,757	-4.31%	0.42%	
10	Meta Platforms (Facebook)	META	\$1.181 T	\$465.71	N/A	-4.70%	

First, let's delve into the unique value of gold: its rarity makes it incredibly precious, and its stability makes it the preferred tool for wealth accumulation. As a star among financial assets, gold possesses intrinsic value, never defaults, and effectively counters

**FB Finance Institute - 15th Session**

credit risk. During financial turmoil or when government debt issues become prominent, gold acts as a safe-haven stabilizer in the eyes of investors, establishing its importance as a primary asset.

Currently, gold's market capitalization is approximately \$16.33 trillion, while Bitcoin's market capitalization is around \$1.317 trillion. However, considering Bitcoin's limited supply and increasing scarcity, its appreciation potential far exceeds that of gold. Based on historical bull and bear market data analysis, it is projected that in this bull market, Bitcoin's price will reach at least \$350,000, bringing its market cap to around \$6.91 trillion.

Bitcoin's demonstrated vitality and growth momentum make us confident that it is destined to rapidly surpass gold's total market value.

With the scarcity of Bitcoin and its growing value, combined with positive policy guidance from our country, we firmly believe that whether in the current market cycle or by the next bull market by 2029 at the latest, Bitcoin's market cap will make history,

**FB Finance Institute - 15th Session**

surpassing gold and becoming an indispensable part of global wealth. We are standing at the beginning of this historical moment!

Trump recently made a remarkable statement at the Bitcoin conference: he likened Bitcoin to the steel industry a hundred years ago, currently in its early stages, with the potential to surpass gold in market value.

This viewpoint aligns with my own. Looking back at history, from the end of World War II until the collapse of the Bretton Woods system, we adhered to the fixed ratio strategy of \$35 per ounce of gold. However, this system was abandoned in less than thirty years. The price of gold skyrocketed from \$35 per ounce to \$2000, almost in tandem with inflation, revealing the profound impact of dollar devaluation. To curb the rush for gold, high interest rate policies were implemented during Reagan's presidency, making US Treasury returns surpass those of gold and maintaining the dollar's dominance for decades.

If cryptocurrencies can serve as a new "reservoir" to absorb dollar liquidity, it may herald a new historical chapter. This is the core of my perspective on Bitcoin's pivotal role in future wealth strategies!

As I share this, I am closely monitoring Ai4.0 parameters and trading signal alerts. Please be ready at any time; I will notify everyone in this group when the timing is right.

Before we discuss how to make our country the global capital of cryptocurrency and a Bitcoin superpower, let us reflect on the valuable lessons of history.

Post-World War II, the United States chose to peg the dollar to gold to dominate the global financial system because it held 70% of the world's gold reserves.

Now, as we face Bitcoin's immense potential, our holdings amount to less than 1%.

If you were the President or a policy guide, what decisive actions would you take to enhance the wealth levels of the populace?

**FB Finance Institute - 15th Session**

Your advisory team would likely suggest integrating Bitcoin as a strategic asset into our national development plan.

This would include supporting cryptocurrency spot ETFs, fostering Bitcoin production companies and mining operations, and controlling the infrastructure of Bitcoin, such as mining farms and the energy sector. These actions would not only reposition us as leaders but also spur technological innovation and job growth.

Therefore, we should not view Bitcoin as a competitor to the dollar but recognize it as an excellent tool for combating inflation. Compared to gold, Bitcoin has stronger anti-inflation properties, which can help stabilize the dollar's purchasing power and improve our quality of life.

Looking ahead, if we boldly imagine Bitcoin reaching \$1 million per coin by 2029, the appreciation potential for spot trading would be 14 times, while a 100x leverage contract could potentially increase by 1400 times.

This is not just an opportunity for wealth growth but a crucial step toward achieving financial freedom!

Important Announcement: We have just released the latest trading signal in the exclusive trading signal group. Please execute it immediately!

Dear friends, as the market fluctuates following the Bitcoin conference, some claim that the bullish momentum has been fully realized, suggesting a potential pullback for Bitcoin. However, I firmly believe this is a shortsighted view. Even if the market declines, we can still profit through short contracts, and such short term corrections often present us with better opportunities for spot trading.

More importantly, increased market volatility offers tremendous profit potential for contract trading.

As we approach the release of the Non-Farm Payroll data this Friday, which is one of the most significant events in the investment market, we are presented with a rare high volatility investment opportunity in the cryptocurrency contract market. These data points are crucial not only for global investment

markets but also for our cryptocurrency contracts.

I am confident that in such a market environment, we have the chance to achieve over 300% returns in a single trade!

Therefore, Thursday and especially Friday this week will be critical for executing our major trading plans. Please ensure everyone is fully prepared to seize this rare opportunity.

Many friends have achieved significant results through customized profit strategies tailored via private messaging with me. This not only highlights the immense advantages of personalized strategies but also underscores the importance of in-depth learning and precise execution.

**The advantages of personalized strategies are mainly reflected in two aspects:**

Firstly, for different capital accounts using the same trading signals, the scale of the capital directly affects the returns. Larger

**FB Finance Institute - 15th Session**

capital can achieve significantly higher returns compared to smaller capital accounts, and this difference can be substantial.

Secondly, personalized strategies allow for the flexible application of combination strategies. Small capital accounts are often limited to participating in shorter cycle trades, while larger capital accounts can engage in longer cycle trades. Long-term trades can yield greater fluctuations and higher profit potential, sometimes exceeding 150% or even 200% profits.

Under controlled risk conditions, the profit potential of larger capital accounts is often several times higher than that of smaller accounts. Therefore, the actual profit gap can be 10 times or even 20 times larger.

This profit plan is not just a financial investment practice but also an important learning opportunity. By fully committing, following strategies, and understanding the logic behind each trade, we will cultivate more outstanding talents like the “Shark” and the “Wizard.”

I urge those who have already achieved significant results to

**FB Finance Institute - 15th Session**

maintain their momentum; and those whose results have not met expectations should not be discouraged, but continue to strive.

Now is the best time to prepare for a powerful profit cycle! I

believe that in this Friday's summary, the differences among everyone will become even more apparent.

If you encounter any obstacles or issues, please feel free to communicate with us. We will work together to solve problems, optimize strategies, and seize opportunities.

Dear friends, we have just successfully closed a contract trade, achieving an impressive profit of approximately 80%. Practical experience is the best teacher, so how did we achieve this success?

Today, I want to share with you an advanced course in the Ai4.0-Trading Signal Decision System: Trading Secrets of Bollinger Bands (p1), which forms the foundation of all our advanced courses.

The magic of Bollinger Bands lies in their ability to display various patterns, each with different meanings and corresponding trading signals. In the Trading Secrets of Bollinger Bands course, I have categorized these patterns into five types, and I will explain the trading strategies and signals for each.

The core investment philosophy of the legendary trader Jesse Livermore—trend trading—remains widely used among traders worldwide. His key principles include:

1. Prices tend to move in the direction of least resistance.
2. Once a trend is established, it is difficult to reverse.

When the three bands of Bollinger Bands move simultaneously upwards or downwards, it indicates a clear market trend.

Therefore, prices are likely to continue moving in the current trend direction, and we can participate in the market through trend-following trades.

- In a clear uptrend, we choose to buy (go long) when the price pulls back.
- In a clear downtrend, we choose to sell (go short) when the price rebounds.

Reflecting on the 80% profit trade we just made and combining it with today's course highlights, what have you learned?

<b>Ai4.0 - Future Leaders - 200% Profit Challenge Plan</b>							
Achieve an 200% Return on Total Assets in Just 7 Days! Follow the Rules Strictly, and We Cover Any Losses! Customized Investment Plans to Help You Quickly Become an Investment Leader!							
Date	Transaction Type	Total Amount Invested	Profit Ratio	Average P&L	Cumulative Return Rate	Total Assets Growth	Total Assets Compound Growth Rate
7/28/2024	—	—	—	—	—	\$5,000.00	0.00%
7/29/2024	Platform's native token - 100X	\$500	110%	\$550	100%	\$5,550.00	11.00%

Dear friends, family, and esteemed future investment masters, I am thrilled to share that with the successful closure of our latest trade, our total asset return rate has skyrocketed to 32%!

**This is not just a victory but a vivid demonstration of our strategic execution. Now, it's time to take the next step:**

Firstly, we plan to invest 50% of the profits from this contract trade into a 7-day fixed income product. This is a safe and stable choice, ensuring our assets continue to grow steadily.

Secondly, if you missed the previous trading signals because you didn't have cryptocurrencies, please contact my assistant immediately. She will help you quickly get in touch with the trading center's customer service or C2C representative, allowing you to participate in our profit plan conveniently and safely!

Thirdly, once you are ready, please promptly send your recharge screenshot or account balance to my assistant. She will ensure you are prepared to participate in the next trading signal because

**FB Finance Institute - 15th Session**

every opportunity could lead to significant wealth growth!

Lastly, please share your trading profit status in text form so we can all share in your joy and achievements!

Also, pay special attention to the "Shark's" session at 3:30 PM ET. He will explore four key strategies to conquer the cryptocurrency market, bringing you more insights and inspiration! Have a pleasant day.

---

### **Closing Commentary ( $\alpha$ & $\beta$ Strategy)**

Ladies and gentlemen, good afternoon. "Simplify investing, elevate countless families' quality of life." I'm Richard Bill, a devoted disciple of Prof. Clark, a proud beneficiary of the AI 4.0 system, and a strong contender for the next Chief Practical Instructor. Thank you all for your unwavering support!

If you're in my class today, you're in luck! I'm not just gonna talk about optimizing market strategies; I'm gonna break down the key methods to balance risk strategies in contract trading. And

**FB Finance Institute - 15th Session**

the most exciting part? I'm sharing all four strategies of my  $\alpha$ & $\beta$  trading system. Yep, all four! These aren't just tools to crush competitors like Mr. W; they're your go to strategies to confidently navigate any market environment. These strategies have won me financial freedom – though, let's be real, I spend money fast.

So, here's my challenge to you today: How valuable is this knowledge to you? Show your support with simply clicking vote. Let's embark on today's most impactful course journey together.

Stock market vibes lately, feels like a sailboat stranded in the Equatorial Calms. Trading volume's been shrinking, just like the tide pulling back. It makes you wanna take a nap. Maybe I'm being a bit too cautious, but with the election around the corner and big companies dropping disappointing earnings reports, I'm reminded of Buffett's classic line: "Only when the tide goes out do you discover who's been swimming naked." That unease is real, but so is the skepticism – unless we up our strategy game.

Picture this: like a crypto newbie trying to hop between rule bound platforms, only to get temporarily stuck. But once you've got Trust Wallet, it's like having the keys to the kingdom, letting you glide between different assets with ease. You've a choice.

Speaking of choices, right now, in the spot trading world, mixing BTC with institute tokens offers more stability and future promise than crypto related stocks. Bottom line, you've got the power to choose. So, why stick with a boring, stagnant market when you can explore broader, high potential profit avenues?

Take a look at the Future Leader 200% Profit Plan. It's not just about seizing market opportunities (hedging risks), optimizing your portfolio (combining crypto contracts with cutting edge AI tools for unprecedented returns), and smartly tweaking your strategy (grabbing the core profit directions of the market). Everyone's got the right to take charge!

Folks, think about what you might lose and what you stand to gain. This is the moment to make decisive moves. If not now, when?

Losing stocks got you down? Don't sweat it, cause the Future Leader 200% Profit Plan is here to turn things around. After today's session, I'll be rolling out the latest custom plans from the institute.

First things first, folks, you gotta understand that the Future Leader 200% Profit Plan is a golden opportunity you can't afford to miss. It's like we're mining for gold with a treasure map in hand.

Even with Prof. Clark swamped by the upcoming AI4.0 system launch and the largest training cohort in history, they made time to tailor this plan just for you. This isn't just about meeting the high demand for lucrative investments; it's about building a loyal base of AI4.0 system supporters within the institute.

Bitcoin conference? Let me break it down. Imagine, folks, it's like the crypto world's carnival just kicked off. Not only is Bitcoin getting a formal invite from mainstream finance, but it also means we crypto investors get to put on our dancing shoes and move to the market's rhythm.

The market leaders are finally shouting for everyone to join in, making the whole crypto stage livelier and more mature. Their actions are like lighting a torch for the entire crypto community, bringing new direction and hope. In short, it's a historic moment, like surfers in the crypto world finally catching the perfect wave.

Folks, ever wonder why you're so lucky? Sit tight and listen to my story. Remember February 2021? That was when BTC skyrocketed by 36%. I took a modest \$500K and used the  $\alpha$ & $\beta$  leverage

**FB Finance Institute - 15th Session**

strategy, a branch of Prof. Clark's academic theory. Even though I didn't execute it perfectly and only made 30x instead of the ideal 50x, that experience taught me that in the crypto ocean, with Prof. Clark's strategies as your compass, even a small investment can yield massive returns. That's the beauty of crypto contracts – limited losses, unlimited gains.

Losses? That's our baseline promise. As long as you strictly follow the strategy, your mentor will support you every step of the way. That's why I say you're luckier than I was – with a mentor's guidance and commitment, you get to learn real world skills in real time.

Here's the truth: In the investment market, to stand alone and succeed, you usually need just one model and one opportunity. Just like I realized through the  $\alpha$ & $\beta$  strategy in a particular trade. I have a friend who's even more impressive; using the same method, he turned \$100K into \$30M in just six months in this crazy market. Now, isn't that the perfect mix of wisdom and luck? After that, I couldn't stop and made wealth that many would envy, but, unfortunately, an investment in a vineyard swallowed my

cash flow. But that's precisely why my restless spirit came back to fight.

And today, with AI4.0 and a mentor's dual protection, this challenge plan isn't just about financial growth; it's a journey of deep learning and personal growth. Just like what I learned from my mentor – not just trading skills, but also decisiveness, a big picture view, and the ability to steer the ship.

Folks, the crypto bull market is blazing like wildfire, and the opportunities are more tempting than ever. So here's the question: If this land is so fertile, why aren't we focusing our main firepower on it?

Let's talk about our portfolio strategy. I've got a few adjustments for you: First, sell off those underperforming stocks and funnel that cash into the Ai4.0 - Future Leaders - 200% Profit Challenge Plan. This isn't just a challenge; it's the culmination of the professor's wisdom. Based on data from the last two beta tests, hitting that 200% target should be a piece of cake. Secondly,

**FB Finance Institute - 15th Session**

now's the golden time to buy Bitcoin – it's at a low point. As for the institute's token, I'm not setting the target at \$7; my starting point is \$20. Once you grasp the power of the AI4.0 system, you'll be a believer. Lastly, use the powerful tool of contract trading to explore the market – whether on land, in the sky, or on water, pick your passion. There's prey out there waiting for us to capture.

So, what's our move? Mr. W has proposed a 20 win strategy, and how am I gonna counter that? That's what I'm sharing today. If you're in today's session, you're lucky, because I'm unveiling the four weapons of  $\alpha&\beta$ . These aren't just the core of my past victories; they're the secret weapons of the  $\alpha&\beta$  trading system. They're the four swords I'm confident will lead our supporters to victory and the fantastic four that will guide you to financial freedom!

Folks, look at the charts and note the Fantastic Four! Because all trends are encapsulated by these strategies, even though MA4/10/20 might not have the same win rate, they can still be a good substitute in practice.

### 1. Quantitative Conditions for the Most Cost-Effective Buying/Selling Point Strategies:

- ~ MA13/34/55 showing a bearish alignment.
- ~ MA13 starts to turn upwards; the steeper the angle, the better.

- ~ A mid to large bullish candle crosses above MA13 or stays above it.
- ~ Trading volume begins to increase, ideally multiplying.
- ~ MACD's DEA/DIF shows a bullish crossover.

## **2. Quantitative Conditions for the Safest Buying/Selling Point Strategies:**

- ~ MA13/34/55 showing a bullish alignment.
- ~ Volume decreases when the price tests MA13.
- ~ A candle with a lower shadow appears, followed by increasing volume.
- ~ At this moment, the trend is good, and as the price pulls back, there's no increase in selling pressure. The test of MA13 is seen as a positive signal for buyers.

## **3. Quantitative Conditions for the Most Efficient Buying/Selling Point Strategies:**

- ~ MA34/55 showing a bullish alignment.
- ~ MA13 turns upwards near MA34 after descending.
- ~ A mid to large bullish candle crosses above MA13 or stays above

it, accompanied by increasing volume.

~ MACD's DEA/DIF shows a bullish crossover.

#### **4. Quantitative Conditions for Short Spread Trading Strategies:**

~ MA13/34/55 showing a bullish alignment.

~ Price operates above MA13 and moves significantly away from it.

~ Volume doesn't continue to increase and starts to decrease.

~ At this point, because the price deviation is too large, the buying power weakens, and a price pullback is normal. You can reduce your position in advance.

Important! Folks, I've just released the latest trading signals. Make sure to execute them! Now, let's dive into a core topic.

When you realize that the Future Leader 200% Profit Plan is a rare opportunity and Prof. Clark provides us with a broader perspective, it's time to learn how to achieve risk balance in this profit plan. Controlling risk and pursuing profit are our shield and spear to win the market!

Imagine participating in the profit game, applying Buffett's magic of compounding—every round of profit gets reinvested into high-yield fixed-income strategies. The annualized returns over 7 days, 30 days, and 90 days are outstanding; while the returns on these investment products aren't the highest, they're among the top in the industry. It's like finding a gold mine without breaking a sweat, with gold coming to you.

So, do you understand the importance of combining contract trading with financial products now?

Why do these investments offer such high returns? Imagine these trading centers as savvy friends, sharing benefits because they profit alongside you. They thrive in the booming crypto market, knowing how to make money work and sharing those benefits with us. Who wouldn't want a piece of that pie? Through deep investigation, I found these centers profit through loans, fees, mining, and investing in cutting edge decentralized projects. Their expert teams ensure stable and high returns.

Why share these profits with users? It's a smart strategy. They're in a rapid growth phase, attracting more users by investing in the

**FB Finance Institute - 15th Session**

future. It's a classic move, just like Binance and Coinbase did. With the global crypto market booming, exchanges are fiercely competitive, offering more perks to attract customers. That's why Prof. Clark chose them as key allies.

In short, we cleverly make our money work for us while enjoying the fruits of these fast growing trading platforms. This isn't just investing; it's an art, and only those who see the opportunity truly get it!

Ai4.0 - Future Leaders - 200% Profit Challenge Plan							
Achieve an 200% Return on Total Assets in Just 7 Days! Follow the Rules Strictly, and We Cover Any Losses! Customized Investment Plans to Help You Quickly Become an Investment Leader!							
Date	Transaction Type	Total Amount Invested	Profit Ratio	Average P&L	Cumulative Return Rate	Total Assets Growth	Total Assets Compound Growth Rate
7/28/2024	—	—	—	—	—	\$5,000.00	0.00%
7/29/2024	Platform's native token - 100X	\$500	110%	\$550	100%	\$5,550.00	11.00%
	Platform's native token - 100X	\$500	130%	\$650	230%	\$6,200.00	24.00%
7/30/2024	Platform's native token - 100X	\$500	80%	\$400	310%	\$6,600.00	32.00%
	Platform's native token - 100X	\$1,000	85%	\$850	395%	\$7,450.00	49.00%

Folks, just wrapped up that trade!! Using the minimum standard of \$5,000 and considering our growth, we utilized about 15.15% of our position, raking in around 85% returns, boosting our total

**FB Finance Institute - 15th Session**

assets by roughly 12.9%. Considering the previous 32% return,  $1.32 * 1.129 = 1.49$ , this means our total asset return rate is now about 49%!

Simply put, if you initially invested \$5,000, thanks to this week's four trading signals, your account now sits at around \$7,450, with a net profit of about \$2,450.

If you initially invested \$500K, without counting private signals, your total assets are now approximately \$745K, with a net profit hitting \$245K.

So, which of the four strategies I shared did we use for this trade? Compare and learn! Those who followed my trade and reaped these excess returns, please share your profit screenshots in this group. I want to see your profit states and execution power. Later, I'll share even more crucial content: the custom tailored plan.

I'm incredibly happy to see everyone's strict execution and the extra returns you've made. It's fantastic! Now, take half of the profits from this contract trade and reinvest it into fixed-income

products with decent annualized returns.

This not only builds an unbreakable investment fortress but also kicks off a compounding magic that's even more incredible than Warren Buffett's. What I'm sharing today is the art of balancing risk and return, letting our profits work for us, and enjoying a relaxed investment life. This isn't just a strategy; it's a supreme life philosophy.

However, a few of you didn't execute well. Please quickly identify the reasons or message me privately. Folks, you must understand that every single trade is precious. As traders and investors, we must learn from hunters—embrace their patience, decisiveness, and resilience. Just as Prof. Clark taught us—avoid arrogance and impatience. Investing is a beautiful endeavor, and execution is the key to victory!

Team, dreams fuel our journey! Dreams are the driving force that pushes us forward. They are the fire within us and a testament to every brave step we take. Remember what Prof. Clark taught us—life has a crucial milestone: achieving financial freedom! So,

**FB Finance Institute - 15th Session**

how many Bitcoins do you need to reach that dream? Our Future Leader 200% Profit Plan is the launchpad for accumulating Bitcoin. That's why I'm here—to pave the way to financial freedom with my supporters.

Dreams are powerful, but the journey might be winding. Take the recent market fluctuations, for example; if you bought at a peak, you might feel a bit frustrated. But don't worry! I promise on behalf of the institute: send your trading records privately to me, Mr. W, or Prof. Clark. We will tailor a strategy for you to double your gains!

This isn't just about profit; it's about our unwavering commitment to success and our respect for Prof. Clark's core educational philosophy. Most importantly, we are confident in the AI4.0 system's profitability, combining current crypto spot trading and contract trading!

Let's stand together on the eve of this Friday's Non-Farm Payroll data release, ready to embrace the surge in market volatility—signaling even bigger and bolder profit opportunities

**FB Finance Institute - 15th Session**

ahead. Remember what Prof. Clark emphasized this morning? Thursday and Friday will be dynamic. Our mission is clear: catch that big fish, with a single trade bringing over 300% returns! I urge everyone to prepare for this critical moment. This week's extraordinary potential demands bold and decisive action.

### **Today's Interactive Q&A:**

1. How have recent stock fluctuations affected your portfolio? Has it shaken your confidence? Do you have a solid plan? How can we support you?
2. With the upcoming trading opportunities from the Non-Farm Payroll data this Friday, expecting over 300% returns, what preparations have you made?

Finally, if you found today's insights helpful, cast your sacred vote for me. Let's harness this momentum together and chase after even greater victories!
