

Dear friends,

Happy weekend! The cryptocurrency market never rests, and the weekend has already revealed unparalleled trading opportunities. Moreover, the dual trading mechanism of crypto contracts allows us to profit in any market environment. Our shared goal is to let the "weekend" help us earn money and achieve a 200% total asset return!

This weekend is crucial, I've cleared my schedule of all engagements to fully dedicate myself to our trading plan. Today's trades not only affect the completion of the Future Leaders 200% Profit Plan but also influence our next strategic moves.

From reading your messages, I've seen that most of you have achieved remarkable success by following this profit plan, but I've also noticed several issues. In the face of the current complex market situation, we must confront challenges head-on and respond proactively. We need to learn from our experiences, adjust our strategies, and develop targeted plans. This will

FB Finance Institute - 15th Session

determine whether we can overcome obstacles, stay ahead of the market, and reach new heights.

I have been closely monitoring the Ai 4.0 system's data for the past two hours. Shortly, I will be looking for the best trading opportunities and will post the latest trading signal in this group. Please stay tuned.

Ai4.0 - Future Leaders - 200% Profit Challenge Plan

Dear friends,

In the world of investing, finding the light of certainty is always

FB Finance Institute - 15th Session

exhilarating! The recent short selling opportunity was precise and timely, truly thrilling! Thanks to the Ai 4.0 system, its powerful machine learning capabilities have allowed us to navigate the complexities of the market with ease, far exceeding our expectations.

A warm congratulations to the future investment leaders participating in this profit plan! Through 12 trades, we have achieved an astounding 1460% cumulative return rate and approximately 210% total asset return! We not only met our profit target within the predetermined timeframe but also forged a new path in the face of highly unfavorable stock market conditions. This success is the culmination of collective wisdom and a testament to reaching new heights in life.

Challenges have helped us adapt to trends and grow rapidly, making opportunities omnipresent. Embracing challenges is the secret to maintaining our youthful vigor!

Now, let's take a more prudent step: Invest half of the profits

FB Finance Institute - 15th Session

from this contract trade into fixed-income products with a duration of 7 to 90 days. This is not just a suggestion, but a strategy that balances offense and defense, protecting your gains while building a solid fortress for your financial security. This is a strategy and trading signal that combines both offense and defense!

At the end of Friday's session, I initiated a questionnaire to gather feedback on everyone's gains and satisfaction with the internal testing and Future Leaders 200% Profit Plan, as well as the issues encountered in this week's trading. I also sought everyone's suggestions.

Here's a summary of the key issues identified so far:

First Category of Issues:

The stock market's steep decline has been likened to a crash, and many friends need an effective investment plan to navigate these tough times and turn losses into profits. The extreme market volatility forces us to seek stronger strategies and maintain

unwavering determination.

Second Category of Issues:

Lack of familiarity with crypto contracts leading to operational errors.

This is precisely why I always provide trading signals based on the minimum standard, to help beginners avoid common mistakes. Although crypto contracts are relatively simpler than stock options, we can still avoid these unnecessary errors. Fortunately, most friends have strictly followed the trading signals, resulting in an approximate total asset return rate of 200% this week. Many even exceeded this target, demonstrating outstanding performance!

Third Category of Issues:

Some friends' profits did not meet expectations, mainly due to:

- Too much information in the group, causing important signals to be missed.
- Poor timing of purchases, leading to reduced profit margins.
- Errors in position management, resulting in inefficient trades.

-Being influenced by the profits of friends with larger capital, affecting mindset and actions.

At the same time, I received many enthusiastic responses from everyone, which deeply touched me! Your suggestions mainly focused on three areas:

First Category: In-depth Study of the Cryptocurrency Market. Many friends believe that contract trading is an indispensable part of an investment portfolio. By combining high frequency trading practice with courses, we can quickly enhance our trading skills and achieve better investment results.

Second Category: Seeking an Extension of the Future Leaders 200% Profit Plan.

Given the current severe stock market situation, everyone generally hopes to hedge stock market risks and recover previous losses through cryptocurrency contracts and institute tokens.

Third Category: Anticipating Deeper Collaboration.

- Many have expressed that the outstanding performance of the

FB Finance Institute - 15th Session

internal testing plan and the Future Leaders plan has increased their confidence in the cryptocurrency market.

- Several friends have praised the combination of the Ai 4.0 system with crypto contracts and are eager for more opportunities to collaborate with us.

- Many have recognized our institute's social responsibility and wish to increase their investment in the cryptocurrency market. They are inquiring whether we can develop more in-depth collaboration plans and customized investment solutions to ensure returns and share in the dividends.

Thank you to everyone for your participation and support. Your trust and feedback are the greatest motivation for us to move forward. Every suggestion and every effort you make is the foundation of our collective progress.

We will actively explore these possibilities to provide better support and opportunities for everyone, ensuring that everyone can benefit.

We are one family, walking this investment journey together, side by side, to embrace a brighter future. To better meet everyone's needs, today I will conduct a more in-depth analysis of your feedback and update our latest plans.

Wishing you a pleasant weekend, and I look forward to your continued feedback. Thank you, everyone!
