Morning Review

AI 4.0 
STRATEGIC PARTNER
INVESTMENT PLAN

Personalized Plan:
 Custom-tailored investment strategies based on your capital size, with potential returns reaching as high as 300-1000%!

Partnership Agreement with Guaranteed Returns:
 We offer partnership contracts with guaranteed returns. With a profit-sharing clause, the Institute will compensate you if the target return is not met.

Tiered Services with Premium Privileges:
 Premium accounts enjoy greater returns from trading signals, priority access to those signals, more trading opportunities, and lower risk levels!

Token Market Value Management Plan:

- Stable returns, with the Institute's token price continuously rising!
- Hold tokens to enjoy lifetime dividends from the Ai 4.0 system!
- Additional Bonus: For purchases exceeding \$100,000, receive an extra 5-10% in tokens!

Message me now to join and embark on a journey to multiply your wealth, achieving a life of financial freedom!

FB Finance Institute - 15th Session

Dear friends, family, and esteemed future investment masters,
good morning!

Last night, I shared in detail our ambitious "AI 4.0 Strategic Partner Investment Plan," explaining the reasons, necessity, and significance behind launching this investment plan, as well as the future mission upgrades, planning, and safeguards. We have set our profit targets and outlined our action plan.

This will undoubtedly be the battle that takes us from "Future Leaders" to becoming the dominant forces in the market, and it will also be my final hands-on practical teaching session. It is an incredible honor to undertake such a glorious endeavor with all of you during this critical period.

Many of you are already prepared, and I, too, am fully geared up. Starting today, I will lead you toward this unprecedented profit target. If we succeed, this will mark a significant milestone in the history of the institute!

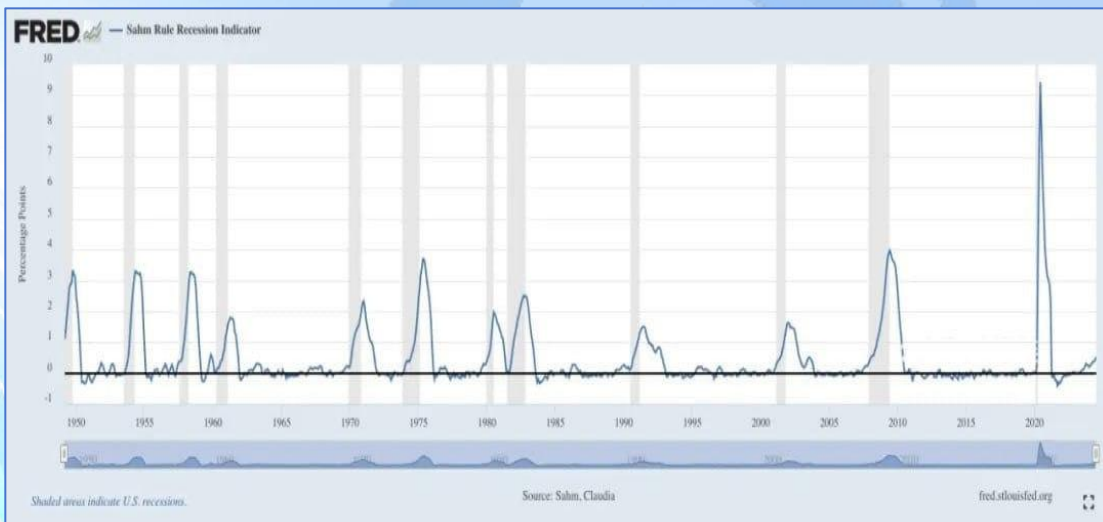

How will I guide you to better achieve this goal? What key points

FB Finance Institute - 15th Session

must we focus on during this process? Why do I predict an upcoming profit opportunity with returns exceeding 1000%-4000%? How should we act?

These are the core themes I wish to discuss with you today. Let's open a new chapter with enthusiasm, prepare to conquer new heights, and redefine what it means to succeed!

Urgent Alert, A Stock Market Crash is Coming!

Those who heeded my advice to sell their stocks last week are undoubtedly fortunate. However, if you have passively reduced your positions, it's crucial to pay attention to today's insights. This will not only help you avoid significant losses but also provide you

FB Finance Institute - 15th Session

with a unique path to recovery. Let me briefly share my key perspectives:

Perspective 1: Why is an Epic Collapse Forming?

The Sam Rule is an empirical observation: when the average unemployment rate over three consecutive months exceeds the lowest unemployment rate of the previous year by 0.5%, the economy inevitably enters a recession. How reliable is this indicator? It's nearly ten out of ten accurate—never failing. The chart above shows data from the Sam Rule indicator since 1949 (blue curve) and its correlation with economic recessions (gray vertical bars).

The weak employment data in this latest non-farm payroll report has sparked tremendous concern over a broader economic slowdown. Following the report's release, both the stock market and U.S. Treasury yields plummeted. Coupled with the impact of the Middle East conflict, today's stock market crash is particularly severe.

Dear friends, now is the time to take action. An epic collapse is forming, and the warning signals are too significant to ignore. Adjusting your strategy quickly to protect your assets is more important than anything. Let's navigate through this storm together!

Perspective 2: How Long Will This Wave of Panic Last?

The VIX, often referred to as the fear index is a key indicator of market sentiment and volatility. When the VIX spikes, it usually

FB Finance Institute - 15th Session

reflects extreme concern over macroeconomic factors, political events, or other uncertainties.

Once market sentiment dives into panic, investor behavior becomes more emotional and short-sighted. This leads to frantic asset selling, further market declines, and heightened volatility. This negative feedback loop prolongs the panic, making it difficult for the market to stabilize in the short term. When the VIX surpasses 20 points and surges, it signals an unprecedented level of market fear and uncertainty.

Historically, such trends can last anywhere from a month to six months, with the market struggling to dip back below 20 points. Given the recent surge to a staggering 66 points, it's unlikely that the indices will recover throughout August.

Even if the Federal Reserve cuts rates in September, it will be a reactive, necessary measure that won't immediately address the underlying issues. The market's panic and volatility will continue to trouble investors, with uncertainty remaining on the horizon.

In this context, smart investors must seek new avenues. What's the best opportunity before us right now? It's participating in the "AI 4.0 Strategic Partner Investment Plan!" This plan not only helps secure returns but also offers a path to recover losses and provides a fresh investment approach.

Dear friends, the market's panic will persist, and a short-term recovery seems unlikely. While the market is shrouded in the gloom of fear, there is still a beacon of hope. My call to action for you in this storm is to join the "AI 4.0 Strategic Partner Investment Plan" this is your lifeboat!

Act now to protect your assets, secure your returns, and recover your losses. Together, let's sail toward the dawn of victory!

FB Finance Institute

Perspective 3: Is BTC's Decline an Opportunity or a Risk?

Why is BTC dropping? It's mainly due to stock investors pulling out funds to prop up the market—a move that's extremely shortsighted. Right now, there are virtually no significant negative factors affecting BTC. So, this current pullback in BTC is absolutely more of an opportunity than a risk.

The logic of the upcoming halving makes this bull market

unstoppable. With increased involvement from corporations, institutions, and the formation of national strategic reserve assets, this bull market is poised to be stronger than any we've seen before.

Perspective 4: Why Is There an Imminent Profit Opportunity with Over 1000%-4000% Potential Returns?

Friends, an incredibly realistic opportunity is right in front of us. According to BTC's daily chart, after each significant drop, there's typically a short-term rebound of at least 10%. This time, with prices pulling back to a key support level, a 10%-40% rebound is within reach in the near term!

From a spot trading perspective, the opportunity with the Academy token is about to explode. With the implementation of the "Strategic Partner Plan" and the "Academy Token Market Cap Management Plan," the chance for the token to double is right at our fingertips. Seize this golden opportunity!

From a contract trading perspective, the BTC-100X contract

FB Finance Institute - 15th Session

presents a short-term trading opportunity with potential returns of 1000%-4000%. Moreover, the performance and opportunities offered by exchange-native tokens, which tend to have even greater volatility, will be even more impressive.

All of these elements will play a crucial role in our “Strategic Partner Plan!”

 A graphic titled 'AI 4.0 Strategic Partner Investment Plan' featuring a table of partnership levels, return targets, and payment rates. The graphic includes a gold coin icon and a background of a city skyline with a rising line graph.

Strategic Partner Group Name	Capital Requirement	Total Asset Return Target	Net Profit Payment Rate
Associate Strategic Partner	\$50,000 - \$150,000	300%	20%
Intermediate Strategic Partner	\$160,000 - \$300,000	500%	15%
Senior Strategic Partner	\$310,000 - \$800,000	600%	12%
Principal Strategic Partner	\$810,000 - \$1,500,000	700%	10%
Executive Strategic Partner	\$1,510,000 - \$3,000,000	800%	8%
Managing Director of Strategic Partnerships	\$5,000,000+	1000%	5%

* We offer partnership contracts with guaranteed returns. With a profit-sharing clause, the Institute will compensate you if the target return is not met.

* Premium accounts enjoy greater returns from trading signals, priority access to those signals, more trading opportunities, and lower risk levels!

Dear friends,

The first rule of successful investing is risk management. The recent market has taught us an important, albeit harsh, lesson.

FB Finance Institute - 15th Session

Such experiences, though difficult, are invaluable. In the storm, we seek a safe haven; in the sunlight, we set sail. These moments test our ability to make precise decisions.

The launch of the AI 4.0 Strategic Partner Investment Plan is significant it not only helps us find a safe harbor but also opens up a bright new path. Allow me to briefly outline some key points of this plan that are closely tied to your interests:

1. Principle of Mutual Benefit

- Every participant's returns will be protected. We can sign contracts that include hedging clauses designed to safeguard participants' interests, with target returns ranging from 300% to 1000%.
- This is not just a groundbreaking initiative in the history of our educational academy but also a commitment to all of you.
- Ensuring the smooth execution of this plan will protect the interests of all stakeholders and increase the Academy's valuation.

When participants allocate 10% of their funds to purchase Academy tokens, the collective impact will drive unprecedented price surges. Those involved in the management plan will enjoy lifelong dividends once the AI4.0 system goes public.

-Ensuring the smooth implementation of the pre-sale plan before AI4.0's launch. According to the agreed terms, participants will be required to pay related fees (5%-20%) upon reaching the target. These fees will be used for the pre-purchase of AI4.0 application subscription services and team service fees.

- High achievers will be granted free access to next year's Academy AI Foundation, enjoying the services of our elite club.

These mutually beneficial terms create binding responsibilities and obligations on both sides, thereby maximizing the protection of everyone's interests.

2. Bonus Period and Fulfilling Commitments

To benefit the community and respond to your calls, we have

FB Finance Institute - 15th Session

decided to extend and expand the "Future Leaders 200% Profit Plan." The Strategic Partner Investment Cooperation Plan is able to be launched on a large scale primarily because the Ai 4.0 system has not yet been released, providing us with a valuable free bonus experience period.

The recent stock market volatility, combined with beginners' unfamiliarity with contracts, has led to fluctuations in both investment sentiment and account values. Despite our best efforts to provide guidance, I feel a sense of responsibility because you entered the market based on your trust in us.

As I teach, I often reflect on my own experiences. I deeply understand what you are going through because I was once a beginner myself. I know that growth comes with learning costs. Greed and fear are part of human nature, but the wise learn from them and avoid repeating mistakes.

I understand that every investor's capital is hard-earned, and no one wants to see their efforts go to waste. Sometimes, a failed investment can not only result in financial loss but also diminish

the courage to face the market. I know this feeling all too well. We've all had our rough days in the market, and every bit of perseverance and effort is directed towards a better future.

Now, we find ourselves in a unique bonus period with the Ai 4.0 system yet to launch, offering everyone a rare opportunity. This bonus experience period is designed to help you fully understand and utilize the Ai 4.0 system, laying a solid foundation for future success.

Dear friends, I sincerely hope that you seize this unique bonus period with confidence, support each other, and act quickly to achieve your dreams! This is not just an investment and collaboration opportunity but also a chance for mutual growth and transformation!

3. The Necessity of Personalized Settings

Dear friends

To ensure that every participant finds the most suitable investment path, we emphasize the importance of personalized

FB Finance Institute - 15th Session

settings. This is not only to meet individual needs but also to maximize our overall returns.

Tailored Investment Strategies

Based on each participant's capital, risk tolerance, and expected goals, we will customize different investment strategies for everyone. This way, you can operate within your comfort zone and find the investment path that suits you best.

Importance of Team Formation

Establishing teams enhances execution. Operating within the same account tier allows for more targeted, timely, and applicable strategies. This helps avoid losses caused by operational errors and gambler's fallacy, ensuring that everyone can move forward steadily.

Advantages of Fund Classification and Planning

Targeted planning and fund classification improve capital utilization, thereby maximizing returns. Different levels of capital are grouped into different teams, each employing specialized strategies, which is more conducive to improving trading skills.

This approach allows you to quickly establish and upgrade your investment system.

Personalized Transition Plans for Risk Hedging

For those who have not deeply experienced the "Future Leaders 200% Profit Plan," the "Strategic Partner Plan" can serve as a personalized transition plan to hedge against stock market risks. This not only protects your capital but also provides a secure investment environment.

Dear friends,

The goal of personalized settings is to ensure that each participant can travel further and more securely on this investment journey. Let's seize this opportunity and fully utilize the advantages of personalized settings to achieve our investment goals.

As we move forward, strict execution of the plan is crucial. For participants who strictly adhere to the trading signals, if any losses occur, we will not only take full responsibility but also

FB Finance Institute - 15th Session

provide compensation according to the contract terms and wagering clauses.

To further motivate everyone, we will offer generous rewards to top performers, including:

- Free access to the Ai4.0 system
- Family travel and educational vacation packages
- Eligibility to join the presale group and experience the beta version of the system

How Can We Achieve Safe and Stable Profit Growth?

First, it is essential to understand the importance of the Wealth Matrix strategy.

While pursuing high returns, balancing risk is critical. I recommend that after each contract trade is completed, you reinvest a portion of the profits into fixed-income products and institute tokens, creating a safety net.

Second, advancing to a higher Strategic Partner Group is an

FB Finance Institute - 15th Session

effective pathway.

Aspiring to move into higher Strategic Partner Groups means employing larger capital combination strategies to achieve low risk, high reward outcomes. In the upcoming practical trading sessions, I will provide detailed explanations on how to effectively use these strategies.

AI 4.0 Strategic Partner Investment Plan

Strategic Partner Group Name	Capital Requirement	Total Asset Return Target	Net Profit Payment Rate
Associate Strategic Partner	\$50,000 - \$150,000	300%	20%
Intermediate Strategic Partner	\$160,000 - \$300,000	500%	15%
Senior Strategic Partner	\$310,000 - \$800,000	600%	12%
Principal Strategic Partner	\$810,000 - \$1,500,000	700%	10%
Executive Strategic Partner	\$1,510,000 - \$3,000,000	800%	8%
Managing Director of Strategic Partnerships	\$5,000,000+	1000%	5%

* We offer partnership contracts with guaranteed returns. With a profit-sharing clause, the Institute will compensate you if the target return is not met.

* Premium accounts enjoy greater returns from trading signals, priority access to those signals, more trading opportunities, and lower risk levels!

Dear friends,

On this investment journey, the differences between the Strategic Partner squads are crucial. Comparing the outcomes of different squads can vividly illustrate the transformative potential that initial investment brings.

FB Finance Institute - 15th Session

Let's take a closer look by comparing the Associate Strategic Partner group with the Executive Strategic Partner group, and you'll see the significant disparity:

- Profit Targets and Net Profit Ratio: The profit targets and final net profit ratio for the Associate Strategic Partner group are far lower than those for the Executive Strategic Partner group.

- Actual Returns: Suppose you invest \$100,000 in the Associate Strategic Partner group; your final returns would not be less than \$300,000. However, if you invest \$2 million in the Executive Strategic Partner group, your final returns would not be less than \$16 million. The difference is a staggering 52 times!

The gap between the ordinary group and the Strategic Partner group is even more evident. The Strategic Partner plan not only offers you the potential for enormous profits but also provides higher quality investment guidance and support. By joining a Strategic Partner group, you'll enjoy unprecedented investment advantages and protection.

Recently, we have already achieved multiple returns in the cryptocurrency market, and the Strategic Partner plan will propel our profits to even greater heights. I hope you will continue to support our Ai 4.0 system in the future, especially the institutional version. Joining a Strategic Partner group is not just about growing your investments but also about supporting our collective efforts and the Ai 4.0 system.

For those who have not yet joined the Strategic Partner group, I must remind you that this reflects a lack of commitment to your own investment growth and a lack of support for our collective efforts. You will miss out on the most critical investment signals and the best profit opportunities.

This is a pivotal moment—there's no time for hesitation! Think about what you have lost in the past two weeks due to indecision.

Dear friends, family, and esteemed future investment masters,

Starting today, the Strategic Partner groups will become the sanctuary for trading signals, while the regular group will

FB Finance Institute - 15th Session

primarily be used for sharing investment methods and important information. Our resources are limited, and trading signals will be exclusively reserved for the Strategic Partner group. This is not just a choice but a testament to our commitment to providing unparalleled value to those who dare to elevate their investment journey!

If you want to go further and more securely on the path of investing, you must join the Strategic Partner group. Being part of this elite group will not only protect your investments but also ensure you maximize your returns during market fluctuations. I firmly believe that this decision is divinely supported; only through strict management and self-discipline can we achieve the desired results!

Reflecting on some of the challenges we've faced over the past two weeks, you will surely understand the importance of this critical decision. It is designed to enhance your investment potential. If you hesitate and are unwilling to invest in your own financial growth, expecting others to take that step for you is

FB Finance Institute - 15th Session

unreasonable! Of course, if you face special circumstances, please communicate with us, and we will work through it together! Today, my message is clear: prepare yourselves quickly. Next, we will begin forming the exclusive group. Those who agree to the terms and complete the cooperation agreement will be invited to join this exclusive group. Then, we will set sail and write our legendary story together! The time to act is now!

At 3:30 PM ET, the Option Wizard will share Warren Buffett's latest strategy with everyone, seizing the most profitable opportunities and leading us toward the goal of a 20 win streak—we're already at 3 wins, so don't miss out. Have a wonderful day!

Closing Commentary

Good afternoon, dear friends! I'm James Wilson. Global stock markets are in freefall, triggering a wave of sell-offs, with only a fraction of investors managing to preserve their profits. The

FB Finance Institute - 15th Session

investment market has entered its darkest hour. In this critical moment, Professor Clark, attuned to the concerns of his students, has decisively launched the “AI 4.0 Strategic Partner Investment Plan.” This plan is like a much needed downpour on parched land, striving to sow seeds of hope, offering us new profit targets and clear trading strategies.

A special note: This will be Professor Clark’s final hands-on teaching session. This is his swan song before retirement, after dedicating much of his life to AI 4.0, sacrificing his health and family to fulfill his vision. I want to say this to all our students: regardless of how much you’ve profited from the first two rounds, take the “AI 4.0 Strategic Partner Investment Plan” seriously. Every student who participates will become our partner. Together, we’ll support each other, weather the storm, and conquer the market! Let’s give our respect to Professor Clark, take up the sacred torch, and lead the way forward! Let’s pursue even greater gains in the cryptocurrency market!

I have a vision, and I believe this is the most difficult and

FB Finance Institute - 15th Session

disheartening moment for investors worldwide. The U.S. stock market has plunged, European stocks have followed suit, the Turkish stock market hit circuit breakers at the open, and Asia-Pacific markets are in freefall. Japanese stocks have triggered circuit breakers multiple times. Global markets are experiencing a “Black Monday.” But as early as July 18th, I warned of these risks and urged everyone to seize the certain opportunities—specifically, the Institute Tokens. We can clearly see that as AI 4.0 approaches its launch, along with the success of internal tests and profit plans, the Institute Tokens have firmly secured a position above \$3.60. If you exercised diligence and followed my advice, we’ve undoubtedly survived this stock market crash with significant profits.

Now, what does the future hold for the markets?

I will use the strategic lens of options, analyzing multiple dimensions to uncover the future direction of the market. This will help you fully understand our current situation and identify future opportunities. Please take thorough notes so you can grasp

FB Finance Institute - 15th Session

the detailed insights that could change your investment trajectory.
And don't forget to cast your vote for me!

By analyzing the charts, we can observe that after an intense wave of panic, the market has rebounded with a vengeance. The fear index has significantly retreated, and the market is gradually returning to a more rational state. But does this rebound signal a buying opportunity? Let me share my thoughts.

First, from a technical perspective, we can conclude that the relationship between the candlestick and the moving average (MA) is akin to a rubber band. The more it stretches, the more it will eventually snap back to its original size once released. This can be explained using the concept of Implied Volatility (IV) from

options knowledge. Therefore, it's normal for the index to rise and touch the moving average, but this does not indicate a sustained upward trend. The moving average has already turned downward, forming a strong bearish downward channel. In such a channel, any rebound to higher levels is an opportune moment to sell stocks.

Second, Warren Buffett has significantly reduced his largest holding, Apple, and his cash reserves have reached a historic high of \$200 billion. This move sends another signal to an already anxious market: there will be more attractive entry opportunities in the future, but not now. On this point, I align with Mr. Buffett's thinking, a viewpoint I have emphasized repeatedly.

Table 1: Sell the 1st Rate Cut

Returns in the 3 & 6 months following the 1st Fed rate cut

1 st Fed cut	Background	Recession	10Y UST yield		US 2s10s		S&P 500	
			3m	6m	3m	6m	3m	6m
Soft landing			-34bps	-56bps	37bps	28bps	2.7%	10.0%
Oct 2, 1984	1 st cut (to weaken US\$)...soft landing	None	-74bps	-80bps	125bps	79bps	1.1%	10.4%
Jul 31, 2019	1 st cut...soft landing (prior to COVID crash)	None	-32bps	-51bps	2bps	5bps	1.9%	8.2%
Jul 6, 1995	1 st cut...soft landing (after bond crash in '94)	None	3bps	-36bps	-15bps	-0bps	5.1%	11.3%
Hard landing			-23bps	-38bps	61bps	95bps	-6.2%	-3.0%
Sep 3, 1973	1 st cut preceded oil shock/recession	Nov73 - Mar75	-52bps	-12bps	17bps	-48bps	-9.9%	-8.4%
Jul 1, 1974	1 st cut as stagflation raged	Nov73 - Mar75	32bps	-23bps	69bps	154bps	-26.3%	-20.3%
Apr 1, 1980	1 st cut after oil shock, short recession	Jan80 - Jul80	-256bps	-91bps	302bps	166bps	12.5%	24.4%
Jun 1, 1981	1 st cut preceded recession begins	Jul81 - Nov82	195bps	-9bps	-36bps	167bps	-7.1%	-4.8%
Jun 5, 1989	1 st cut was 12 months before recession	Jul90 - Mar91	-19bps	-55bps	-13bps	14bps	9.5%	8.6%
Jan 3, 2001	1 st cut post-dotcom crash, preceded recession	Mar01 - Nov01	-23bps	22bps	46bps	77bps	-17.9%	-8.4%
Sep 18, 2007	1 st cut preceded recession & GFC in 2008	Dec'07 - Jun'09	-35bps	-99bps	43bps	138bps	-4.3%	-12.4%
Crash/credit event			-46bps	-6bps	-16bps	3bps	14.6%	19.8%
Oct 19, 1987	1 st cut after stock market crash	None	-102bps	-81bps	-17bps	5bps	10.9%	14.7%
Sep 29, 1998	1 st cut after LTCM collapse	None	11bps	69bps	-15bps	1bps	18.4%	24.9%

BofA GLOBAL RESEARCH

Third, let's look at the recent details:

1. Due to weak economic data, the market's expectation that the U.S. economy will remain strong over the next 12 months has dropped to its lowest level in seven months.
2. While the market is fiercely debating whether the U.S. economy is slowing down, the U.S. NFP data delivered a heavy blow, with the unemployment rate triggering the "Sahm Rule," which is seen as a clear sign that the U.S. economy has entered a recession.
3. The negative impact of weak employment data has been further amplified by the expectation of a Fed rate cut in September, signaling the end of the dollar's appreciation cycle.

Some of you might think that a rate cut will bring more liquidity and be bullish for the stock market, leading to a rise. Let me explain to you the reality and help you form a correct investment perspective. Since 1970, the Fed has cut rates for the first time 12 times. These rate cuts usually fall into three categories:

“Panic cuts”: When the Fed cuts rates urgently to respond to a

FB Finance Institute - 15th Session

Wall Street crash or credit event, such as in 1987 and 1998.

“Soft cuts”: When the Fed cuts rates during a "soft landing" of the economy, such as in 1984, 1995, and 2019.

“Hard cuts”: When the Fed cuts rates during a "hard landing" of the economy, such as in 1973, 1974, 1980, 1981, 1989, 2001, and 2007.

So, how did the market react in these situations?

Market Reaction: Different types of rate cuts have varied effects on the market. For example, in the case of "soft cuts," the stock market (S&P 500) typically rises by an average of 10% within six months following the first rate cut, while the 10 year U.S.

Treasury yield drops by 56 basis points. In contrast, during "hard cuts," the stock market tends to decline by an average of 6% within three months, with the 10 year Treasury yield decreasing by 38 basis points over six months.

Current Situation: Bank of America Merrill Lynch has highlighted the risk of a "hard landing" in the current environment, advising

investors to sell assets when the Fed initiates its first rate cut.

Performance of Risk Assets: Since 1970, in the nine months leading up to the Fed's first rate cut, the stock market has seen an average gain of 2%. In 2024, however, this figure stands at 32%, suggesting that risk assets may have already excessively priced in the expectations of a rate cut.

Conclusion: Whether we look at technicals, news flow, or the broader macroeconomic environment, it is clear that the U.S. stock market is currently in a bear market downturn. In a bear market, any rebound should be viewed as an opportunity to sell stocks, as this downward trend is likely to continue until after the presidential election. Therefore, I strongly recommend that all students take advantage of rebounds to exit their stock positions at relatively higher levels, as further volatility will likely lead to even lower lows. Holding onto stocks in this environment is essentially waiting for even greater losses to materialize.

The proceeds from selling stock assets can be strategically reinvested. Let's take a look at Bitcoin—this recent crash to 49,000 points was triggered by global market turmoil, geopolitical factors, and led to a wave of panic driven liquidations. This is a significant shakeout, but strong upward movement is expected to characterize 2024/2025, and this week offers the last chance to enter the market before it's too late. The principles of the cryptocurrency bull market remain intact, with the Bitcoin halving and spot ETF focusing global attention on Bitcoin. This panic

induced drop actually presents us with one of the best buying opportunities in the Bitcoin bull market.

Now, I'm going to explain an important technical pattern—Gungnir. Gungnir is known for its accuracy, hitting the target every time it's thrown without fail. It symbolizes war and victory. The technical pattern I'm discussing shares these characteristics—when it appears, it signals that a major market move is imminent and never misses. That's why I've named it the Gungnir pattern.

Characteristics of the Gungnir pattern:

In a sustained uptrend, a massive trading volume spike—Gungnir—appears at the top, while the price stagnates. Gungnir at this point indicates an imminent reversal to a downward trend.

In a sustained downtrend, a massive trading volume

spike—Gungnir—appears at the bottom, while the price stabilizes. Gungnir at this point indicates an imminent reversal to an upward trend.

A trending movement + a top or bottom + a massive volume spike constitutes the Gungnir pattern. Once this pattern appears, it signals that a major market movement is about to begin.

Chart 1: The Gungnir pattern appeared on June 27, 2019. After the Gungnir pattern appeared, the uptrend ended, and the price dropped from 13,000 points to 7,000 points, a decline of nearly 50%.

Chart 2: The Gungnir pattern appeared on March 13, 2020. After the Gungnir pattern appeared, the downtrend ended, and the price rose from 4,150 points to 41,000 points, nearly a 10x increase.

Now, BTC has once again shown the Gungnir pattern, making this week the best time to enter the market. This is one of the best

entry points in this cycle. So, how do we seize this opportunity?
How can we achieve multiple returns in this cycle?

AI 4.0 Strategic Partner Investment Plan

Strategic Partner Group Name	Capital Requirement	Total Asset Return Target	Net Profit Payment Rate
Associate Strategic Partner	\$50,000 - \$150,000	300%	20%
Intermediate Strategic Partner	\$160,000 - \$300,000	500%	15%
Senior Strategic Partner	\$310,000 - \$800,000	600%	12%
Principal Strategic Partner	\$810,000 - \$1,500,000	700%	10%
Executive Strategic Partner	\$1,510,000 - \$3,000,000	800%	8%
Managing Director of Strategic Partnerships	\$5,000,000+	1000%	5%

* We offer partnership contracts with guaranteed returns. With a profit-sharing clause, the Institute will compensate you if the target return is not met.

* Premium accounts enjoy greater returns from trading signals, priority access to those signals, more trading opportunities, and lower risk levels!

Of course, the best move now is to join our AI 4.0 Strategic Partner Investment Plan. My friends, I value this opportunity more than anyone else here. This is our last chance to battle under the guidance of Professor Clark, and it's also the reason why I'm determined to become the next Chief Practical Instructor. I want to prove to Professor Clark that even without his direct oversight, I can still lead our group to achieve significant returns.

Professor Clark, now advanced in age, has pushed his body to its

FB Finance Institute - 15th Session

limits for the sake of AI4.0. This plan, the AI 4.0 Strategic Partner Investment Plan, is his way of giving back to his supporters and the educational community. Whether it's Professor Clark, Mr. B, or myself, we are all approaching this plan with the mindset that “the first battle is the decisive battle, one battle to rule all” aiming to help everyone achieve their profit goals. This isn't just about the profits for our participants; it's also about the successful launch of AI4.0 and, yes, it's in my own best interest as well.

Right now, the stock market offers no viable opportunities, but the cryptocurrency market is presenting a prime buying opportunity. I strongly encourage you to become one of our partners and follow my 20 consecutive win strategy. In life, 95% of things may be beyond our control, but we must still use the remaining 5% of our effort to leverage those 95% of things we cannot decide. So, become our partner, and I will be the force to move you toward your profit goals. I, James Wilson, am your fulcrum. Trust me, becoming my partner is the most correct choice you can make right now!

Next, I will be announcing trading signals for our Strategic Partner groups—signals tailored specifically for you. You can think of it this way: if you follow my trading signals and fail to achieve 20 consecutive wins or meet the expected returns, we will not only take full responsibility but also compensate you according to the terms of the contract and the betting agreement. What you need to consider isn't whether you'll profit, but what you actually want. What is your purpose for investing? Is it to pay off loans or to achieve financial freedom? That's for you to decide. But I must emphasize this repeatedly: this is a once in a lifetime opportunity; if you miss it, there will be no second chance!

Investing always requires going with the flow. When the right market conditions arise, only then can we achieve higher profit targets because you can't create something out of nothing! Also, for all those who become our Strategic Partners, I will provide options trading signals after the market crash! By utilizing a combined investment approach, we can accelerate our profits!
