

## Morning Review

Good morning, dear students and strategic partners! This is James Wilson, here to share the latest morning investment market updates with you. I want to remind everyone that we are now in the "critical moment"! This week is Super Data Week, and we might face several uncertainties that could suppress the rebound in the U.S. stock market. However, for the cryptocurrency market, this week presents us with even more investment opportunities. To seize these opportunities, I will be providing trading signals more frequently, so please stay alert and keep an eye on the latest instructions in the group to avoid missing out on valuable opportunities!

If you missed any trading signals due to personal reasons, please reach out to me privately as soon as possible. Our goal is not just 300% to 700% returns; this is merely our starting point. In this investment battle, we will outperform Mr. B's team with our exceptional profit track record! Let's get started with today's morning share!

## AI 4.0 Strategic Partner Investment Plan(Wizard)

Strategic Partner Group Name	Associate Strategic Partner		Intermediate Strategic Partner		Senior Strategic Partner		Principal Strategic Partner	
Capital Requirement	50K-150K		160K-300K		310K-800K		810K-1.5M	
Total Asset Return Target	300%		500%		600%		700%	
Performance Date	Cumulative Rate of Return (Minimum)	Total Assets Compound Growth Rate (Minimum)	Cumulative Rate of Return (Minimum)	Total Assets Compound Growth Rate (Minimum)	Cumulative Rate of Return (Minimum)	Total Assets Compound Growth Rate (Minimum)	Cumulative Rate of Return (Minimum)	Total Assets Compound Growth Rate (Minimum)
	8/9/2024	495%	26.81%	650%	37.58%	860%	49.73%	1160%
8/12/2024	545%	29.98%	710%	41.70%	940%	55.72%	1255%	75.38%

The U.S. July PPI data came in below expectations. The PPI index, representing final demand, rose by just 0.1% from the previous month, while the median forecast from economists surveyed by institutions was for a 0.2% increase. Following the release of the weaker PPI data, traders have increased their bets on the Federal Reserve easing its policies. As a result, spot gold saw a quick rise, Treasury bonds continued their rally, and the cryptocurrency market presented an excellent trading opportunity.

To all my supportive strategic partners, please immediately tune in to the group for the trading signals. Together, let's seize the first trading signal in today's market!

Dear students and strategic partners,  
This week is the "Super Data Week," which means our trading signals will become more frequent, offering more opportunities to make money! With the continued upgrade of AI4.0's data collection capabilities, it has become even more powerful, providing increasingly precise signals. In the strategic partner group, we will adjust the trading positions based on everyone's actual situation to secure more stable and substantial profits.

We just executed a trade with 10% of our positions, and it has already yielded profits. Today, we expect to achieve our sixth victory in the 20 win journey! Are you excited about this? For those partners who haven't yet joined the trades, please stay tuned for the group's trading signals. For those students who haven't joined the group yet, please reach out to me as soon as possible. This week's Super Data Week is your best chance to multiply your profits! I will tailor a trading plan specifically for you to help you achieve 20 consecutive wins!

Dear friends,

Amazing! We are witnessing an incredible market movement!

Currently, the Associate Strategic Partner, Intermediate Strategic Partner, and Senior Strategic Partner teams have all successfully hit their profit targets! I must emphasize once again that we are in the midst of a historic level market opportunity. Missing out on this would be a significant loss and a disservice to your investment potential!

Why? If you're only aiming for small profits, you can achieve that through effort and technique. But if you're striving for extraordinary wealth and the financial freedom you've always dreamed of, it requires a substantial capital base combined with a historic market opportunity. And right now, that super opportunity has just begun. Over the next three weeks, we aim to achieve returns of 300% to 700% or more!

For those who haven't yet joined the strategic partners groups, you need to act immediately! This is just the beginning—don't

**FB Finance Institute - 15th Session**

wait until the opportunity passes to regret it. Success always belongs to those who are prepared!

AI 4.0 Strategic Partner Investment Plan(Wizard)								
Strategic Partner Group Name	Associate Strategic Partner		Intermediate Strategic Partner		Senior Strategic Partner		Principal Strategic Partner	
Capital Requirement	50K-150K		160K-300K		310K-800K		810K-1.5M	
Total Asset Return Target	300%		500%		600%		700%	
Performance Date	Cumulative Rate of Return (Minimum)	Total Assets Compound Growth Rate (Minimum)	Cumulative Rate of Return (Minimum)	Total Assets Compound Growth Rate (Minimum)	Cumulative Rate of Return (Minimum)	Total Assets Compound Growth Rate (Minimum)	Cumulative Rate of Return (Minimum)	Total Assets Compound Growth Rate (Minimum)
	8/9/2024	495%	26.81%	650%	37.58%	860%	49.73%	1160%
8/12/2024	545%	29.98%	710%	41.70%	940%	55.72%	1255%	75.38%
8/13/2024	575%	33.88%	750%	47.37%	990%	63.51%	1320%	86.78%

Dear friends, congratulations to all our strategic partners on achieving the sixth win out of our 20 win goal! With 14 more victories ahead, are you filled with anticipation?

As of now, all four teams have successfully locked in profits! As our trading base increases, so does the speed of our total net asset growth. This is the power of compounding: the larger the capital, the lower the risk, the more opportunities, and the faster the overall profit accumulation. The principle is simple—profits generate more profits. When this model is combined with an

excellent trading system and historic level market conditions, you'll witness its unique charm and realize your wealth dreams!

In the higher-level strategic partner group, the advantages of the compounding model are even more pronounced, allowing us to capture large market moves that smaller funds might miss. As you know, small capital often leads to missed opportunities. A seasoned trader will tailor a trading plan based on risk management, so remember this crucial point.

To achieve even higher profit targets, those of you who feel your "ammo" isn't sufficient, please reach out to me immediately. Support me, and together we'll push Mr. B's team's profits to the bottom of the Mariana Trench!

To all friends who have followed the Strategic Partner group's trading signals, we can freely share the joy of our sixth victory—this is a success we achieved together! But please don't forget to allocate 50% of your profits to purchasing Institute tokens. The Institute token has launched a market value

**FB Finance Institute - 15th Session**

management plan, which is expected to bring multiple times returns to our token holders once it concludes!

While our current investments are primarily focused on the cryptocurrency market, it's essential to ensure steady wealth growth through diversified trading. Even the most successful investors like Buffett follow this approach. Smart people learn from the techniques of successful traders, replicate their models, and master them to develop their own trading systems.

Our Institute is intensifying its market promotion efforts and is in discussions with many well known "meme" companies and media outlets. A large scale promotional campaign is about to kick off, which will significantly boost our visibility and influence. So don't think that just because the stock market is rebounding, reallocating to Institute tokens will reduce your returns—that's entirely incorrect! Stocks may offer a few percentage points of return in the short term, but the Institute token has the potential to deliver multiple times the returns with certainty!

Eastern Time on Wednesday morning, that is, tomorrow morning, we will witness the release of the Consumer Price Index (CPI), a crucial economic indicator. I must emphasize once again that the release of the CPI data at this particular time could trigger a market event as significant as the NFP data!

The CPI is a key measure of inflation. High inflation typically indicates rising living costs, which can lead to a decrease in consumer purchasing power. The Federal Reserve closely monitors the CPI data and adjusts its monetary policy accordingly. Global investors and major financial institutions will also use the CPI data to assess the economic landscape and issue decisions that can significantly impact market movements.

Therefore, during tomorrow's morning session, I will continue to guide you in seizing this historic moment. If your funds are not yet prepared, please act swiftly! Make sure everything is ready before tomorrow's morning session so that together, we can capitalize on this week's perfect market opportunity!

All students and partners,

Please cast your votes to support me in becoming the next Chief Practical Instructor! Let's leave Mr. B's votes far behind!

This afternoon, Mr. B will present his trading strategies and insights. We'll all be watching closely to see what this "ordinary Robinhood trader" has to offer. What gives him the audacity to challenge me? While it may not be the most polite thing to say, this is a crucial moment in the ultimate showdown between our teams. I'm eager to see Mr. B give it his all, only to be "easily" defeated by our superior strength, leaving him utterly convinced of our dominance!

Friends, I'll see you this afternoon!

---

## Closing Commentary ( $\alpha$ & $\beta$ Strategy)

AI 4.0 Strategic Partner Investment Plan(Wizard)								
Strategic Partner Group Name	Associate Strategic Partner		Intermediate Strategic Partner		Senior Strategic Partner		Principal Strategic Partner

Ladies and gentlemen, good afternoon. "Simplify investing, elevate countless families' quality of life." I'm Richard Bill, a devoted disciple of Prof. Clark, a proud beneficiary of the AI 4.0 system, and a strong contender for the next Chief Practical Instructor. Thank you all for your unwavering support!

With the rules of the game changing, the real competition only began yesterday! Mr. W got the first move, but after two trades, his meager profits are almost laughable. The returns across different Partner Squads have grown from 26.81%, 37.58%, 49.73%, 67.42% to 33.88%, 47.37%, 63.51%, and 86.78%. It looks

**FB Finance Institute - 15th Session**

like his efforts were in vain, with returns slower than a snail's pace. Team, today we crushed him with just one trade—ready to watch him eat our dust?

This isn't just the start of our final showdown; it's your chance to witness elite level trading in action. I'll be dropping my trading signals live in the group, leaving Mr. W's team in the dust. Today, let's show them what true peak trading power looks like!

Folks, while we wait for the trading signals, let's recap the key points of phase two in our competition:

~ Starting from August 12th (yesterday), Mr. W and I will each be leading the Associate Strategic Partner, Intermediate Strategic Partner, Senior Strategic Partner, and Principal Strategic Partner teams in a 3 week profit showdown.

~ The winner will, beginning in September, take charge of the higher level Senior Strategic Partner and Principal Strategic Partner teams, while the runner-up will handle the Associate

**FB Finance Institute - 15th Session**

Strategic Partner and Intermediate Strategic Partner teams.

~ Supporters of the winning team will receive one year free subscription of the \$1 million Ai4.0 Investment System Institutional Edition. Outstanding supporters will also have the chance to secure regional licensing or distributorship rights for the Ai4.0 system before it launches.

Next up, folks, let's dive deep into the core essence of this showdown.

This isn't just another face off between Mr. W and me—this is the battle of a lifetime, the moment that decides who gets to lead the higher level groups, the Senior Strategic Partner and Principal Strategic Partner groups. Winning these top tier groups? It's practically sealing the deal on becoming the next (16th) Chief Practical Instructor!

This is more than just a competition—it's an all out war, a massive upgrade in the Strategic Partner Program. And let me tell you, my

**FB Finance Institute - 15th Session**

mentor, Prof. Clark, believes in us. He's put his faith in both Mr. W and me because he knows we have what it takes to deliver extraordinary results. I can't thank him enough for that support and trust.

Now, here's the kicker—the rules have shifted to spotlight the AI4.0 presale, making this final round all about one thing: "Raking in more profits." The more we earn, the smoother the promotion, presale, and launch of the AI4.0 system will be.

This profit game hinges on two things: total asset return rate and cold, hard profits. So, I'm calling on every one of you to rally behind me! Let's blow past Mr. W's team, let's crush 'em with our team's fund size, and let's stack up the total asset return and actual profit like never before!

Why am I unstoppable? How will I lead my team to victory? And why must you go all-in to support Me? Folks, this is the core of what I'm about to dive into, and I'll be keeping an eye on those trading signals while I share, updating you in real time.

First off, let's be frank: I've absorbed the true essence of trading from my mentor, Prof. Clark. It's not just about his brilliant strategies; it's the life changing experiences we've gone through together—that's the real secret sauce.

Back in 2018, I started with \$3.7 million, mixing contract and spot trading like a master chef crafting a masterpiece. In less than four years, I turned that into a staggering 4000% profit. That's how I ended up buying a vineyard in Europe.

Now, let me be clear: past success doesn't guarantee the future, but right now, I'm laser focused on contract trading, and my  $\alpha$ & $\beta$  system is unstoppable. I'm brimming with confidence that I can lead you all to great success. Coming back to the Institute isn't just about chasing extravagant dreams for me—it's about hitting new financial freedom goals.

These rule changes? They're music to my ears. It's like I'm back in my element, surrounded by a crew of like minded warriors—nothing gets me more fired up than that. Turning a

**FB Finance Institute - 15th Session**

personal journey into a collective epic adventure is just too thrilling. I've set my sights on even higher financial freedom targets, and those who follow me will, at the very least, hit the middle class level—that's my minimum standard for myself!

**Now, I've secured the initial wave of support. To all my supporters, I'm making five crucial promises:**

**Promise 1: Total Asset Return Growth Target**

Before taking on this responsibility, the total asset return rates for the four teams stood at 26.81%, 37.58%, 49.73%, and 67.42%. My goal is to surpass the original targets for these groups within 3 weeks: 300%, 500%, 600%, and 700%.

I'm promise to deliver 3x, 5x, 6x, and 7x growth on top of our current total asset returns. That means hitting 380% for the Associate Strategic Partner, 688% for the Intermediate Strategic Partner, 898% for the Senior Strategic Partner, and 1172% for the Principal Strategic Partner.

## **Promise 2: Promotion Opportunities for Supporters**

Every supporter will achieve at least one upgrade within the Partner Group this month. Top performers can fast track their way to the elite ranks of Executive Strategic Partner and Managing Director of Strategic Partnerships! The size of your capital directly determines the speed of your promotion!

## **Promise 3: Free Access to the AI4.0 Investment System**

I promise that every supporter will ultimately receive a one year, free subscription to the \$1 million AI4.0 Investment System Institutional Edition—because victory will be ours!

## **Promise 4: AI4.0 System Regional Agent Qualification**

I commit to securing AI4.0 system regional licensing or distributorship rights for our supporters.

## **Promise 5: Cash Reward Distribution**

When I win, I'll share the \$10 million prize reward in cash with my supporters. The top three performers (those with the highest net profits) will receive \$3 million, \$2 million, and \$1 million,

**FB Finance Institute - 15th Session**

respectively.

## **Want to win together? Here's what you must do to join Me!**

### **Step 1: DM Me Right Away!**

Tell me your profit goals and which group you want to join, then get your funds ready—fast. If there's something special you need to discuss, we can talk. But remember this: the size of our fund pool is the key to our net profits and the ultimate victory. The bigger the capital, the better we can crush Mr. W's team! The more profit we generate, the stronger our AI4.0 system presale will be. This is our collective mission—don't hesitate!

### **Step 2: We'll Sign a Detailed Contract to Ensure Everyone Knows Their Role.**

The contract will spell out everything for you, like contributing 5-20% of your net profit to the AI4.0 system presale and team services once we hit our goals. I'm putting my money where my mouth is—if I win, I'm sharing the \$10 million cash prize with you all because the potential gains for us and the Institute are even

**FB Finance Institute - 15th Session**

more massive! The contract's wager clause will protect everyone's interests—if we don't hit our targets, you can hold us accountable!

### **Step 3: Follow My Trading Signals to a Tee.**

Once the contract is signed, our fates are tied together. Your losses and gains directly impact me and the entire Institute. Now's the time for us to push forward as one!

Do this, and everything else will fall into place. Are you ready to win this thing together?

I can't believe Mr. W had the nerve to call us "Robin Hood traders" as a way to put us down. Is it because some members of my team are beginners? Let me ask you, Mr. W—weren't you once a newbie, building your success step by step just like the rest of us? Folks, do you agree with Mr. W's perspective?

We're all adults here, and we should be responsible for our words and actions. Investing is our business, a serious and proud

endeavor. In this country, virtues like reverence, humility, honesty, hard work, and frugality are seen as true measures of character.

Let me make one thing clear: my trading strategy isn't some reckless gamble. The  $\alpha$ & $\beta$  system I use is a core branch of the Ai4.0 system. My approach is built on precise market analysis and solid data. While I pursue returns, I'm meticulous about risk management. My track record and performance have proven the power of these strategies. This isn't just talk—the results speak for themselves, whether in spot or contract trading. The impact is undeniable!

		↗		↗		↗		↗

Folks, the right strategy and rock-solid risk management are what separate winners from losers. Even if you're a beginner just stepping into my world, I'm confident that under my guidance, you won't just earn serious profits—you'll master the art of picking up money in the market. And Mr. W, how exactly are you planning to lead your team to victory? With a "hockey stick"?

To Mr. W's followers: how much have you actually made with stock options? Did you hit 30% total asset return? I'd bet many of you didn't because you're only willing to take tiny risks.

Meanwhile, we fear nothing—we go all in. Starting with Institute Tokens at \$1.8, we've already blown past 180% profits. That's how we roll.

Today's trading results speak for themselves. Mr. W and his team? You're moving at a snail's pace, while we're sprinting ahead. If this were a 1000 meter race, I gave you a 50 meter head start. And now? You're falling behind. Take a close look at our trading records—especially our total asset returns. With just one simple trade, we're leaving you in the dust. And this gap? It's only going

**FB Finance Institute - 15th Session**

to get bigger. Team W, do you need me to give you another 50 meter lead?

So, folks, considering Mr. W's remarks, we don't need your apology. We'll prove ourselves with results. Even if we randomly pick a beginner from our teams, they'll still outpace a snail. Let me tell you who's the real boss around here. I'm more than happy to accept your challenges and provocations, Mr. W! And if you're leaning towards my strategy, you're welcome to join us—even those who were originally backing Mr. W.

For those of you still on the fence, maybe you're not fully familiar with crypto contracts yet, or you're still more focused on spot trading. That's fine. Here's my advice:

~ I'll maintain honest, open communication with all team members, listening to your ideas and suggestions. Whatever strategy you need, we can tailor it to fit.

~ Don't feel like you're behind just because you joined late—I'll treat all team members equally, offering fair opportunities and support.

~ If you hit a rough patch, please reach out to me—I'll do everything I can to support and encourage you, helping you overcome any challenges.

~ I'll foster a positive, growth focused team atmosphere, encouraging everyone to grow together.

~ I'll even create training courses and rewards for newcomers, helping everyone ramp up quickly.

So, folks, if you're still hesitating, let me make it crystal clear: We're ready to welcome you with open arms. Standing with us means walking alongside growth, victory, strength, and pure dominance. Let's be honest—Mr. W just doesn't have what it takes to beat me! How do I know? Because I haven't seen him make a single bold promise.

Here's the deal: when you join my team, you're committing to aiming higher. One day, you'll look back on today's efforts with pride, joy, and a deep sense of accomplishment.

Let's say you make 50% profit on a trade—the difference between the various Partner Groups is staggering. For example, if you're in

**FB Finance Institute - 15th Session**

the Associate Strategic Partner group and you've invested \$50,000, a 20% position would be \$10,000, giving you a \$5,000 profit. But if you're in the Intermediate Strategic Partner group and you've invested \$160,000, your final profit would be \$16,000. Now, imagine what happens when you really step up and invest more! With the protection of the Strategic Partner contracts, the more you invest, the bigger your returns. So don't hold back—push yourself to your full potential and watch your profits skyrocket!

Alright, here's the plan, folks: Take half of the profits from that last contract trade and funnel them into a 30 day or 90 day investment, or better yet, into Institute Tokens. This way, we keep things balanced and further solidify our wealth fortress.

Now, here's the kicker: once you grasp the logic behind this, you'll see why August is the new starting point for financial success. Word on the street is that the Biden is about to drop a game changing statement, outlining a roadmap for reasonable regulation. This will allow companies to innovate in the U.S.,

create millions of jobs, and even gain bipartisan support. Winning the 21st century and the digital economy? It's all riding on this.

This is huge for the crypto market. Historically, after halving, BTC tends to skyrocket about six months later—timing that lines up perfectly with the Fed's expected rate cut next month. We're standing on the brink of a massive crypto surge. Join us, and let's ride this unprecedented wave together!

Folks, the most crucial CPI data of the week is dropping tomorrow, and its impact is second only to the NFP. Get ready—I'm here to guide you through the waves. That's all I'm sharing for today. If you found my advice useful, cast your vote for me and join our team. Let's dominate this market together! Thank you!

---
