Ladies and gentlemen, good afternoon. "Simplify investing, elevate countless families' quality of life." I'm Richard Bill, a devoted disciple of Prof. Clark, a proud beneficiary of the AI 4.0 system, and a strong contender for the next Chief Practical Instructor. Thank you all for your unwavering support!

Today is the day we make our bold moves, no holds barred! Our mission? Not just to edge past Team W, but to obliterate them. If you're still hesitating, it's time to snap out of it and get your head in the game!

FB Finance Institute - 15th Session

We're about to get hit with the August one year inflation rate expectations and the Michigan Consumer Sentiment Index—two heavyweights that are gonna shake things up. If they match up, the market's gonna trend like a beast. If they don't? Buckle up for some wild swings—this is where you pounce, buying low and selling high like a pro.

This is your perfect shot—your chance to watch those profits explode. The weekend's about to get wild, and I'm asking you—are you ready? Stick close to this group, cause I'm dropping real time trading signals, and you don't want to miss a beat.

While we're all eagerly waiting for the big surprise, let's dive straight into yesterday's bombshell: Harris is making waves! If she wins the election in November, we're looking at some serious, bipartisan-backed cryptocurrency legislation.

Jeremy Allaire, CEO of Circle, is pumped about Harris's pro-crypto stance.

In Congress, there's talk about scrapping the SEC's outdated crypto custody rules (SAB 121), pushing forward the FIT21 bill, and getting Harris to recognize the crucial role of crypto in remittances.

So, what's the deal?

~ Bipartisan support is gonna give crypto a clearer legal framework, boosting market confidence. This news is as electrifying as Trump's, and the election is setting up a bright future for the crypto market.

~ Harris working with the crypto industry means policies will be

FB Finance Institute - 15th Session

more practical and effective.

~ Getting rid of old accounting rules can help crypto companies cut costs.

~ The new Financial Innovation Act will lay down clearer rules for crypto.

~ Focusing on crypto's role in cross-border payments will boost its usage and acceptance. If these policies come through, investing will get smoother—and we all know how frustrating those bank wire transfers can be. So, right now, face to face cash out through C2C merchant reps might be your best bet.

Bottom line: Crypto's about to take off, and the bull market is just around the corner. Prices are sitting at the bottom of the smile curve—it's time to make your move. Are you with me?

Important Alert, folks! I just dropped the latest signal in my group while I was monitoring the market. Stay sharp and seize every opportunity!

Alright, folks, let's break it down: The one year inflation rate expectations and the University of Michigan Consumer Sentiment Index are key indicators that measure inflation levels and consumer confidence in the economy. Simply put, if both of these numbers suggest a strong economic outlook—like a high confidence index and low inflation expectations—that's good news for the dollar but bad news for stock indices and cryptocurrencies. Why? Because higher expectations for economic growth and low inflation drive up demand for the dollar.

On the flip side, if these numbers point to economic instability—like a low confidence index and high inflation expectations—that’s bad for the dollar but good for crypto, as the market gets jittery about economic growth and inflation.

Typically, significant economic data brings better volatility, trends, and opportunities. Take today’s data, for example—it was bullish for the dollar and bearish for crypto. We jumped on that trend, set up a bearish contract, and we’re already seeing some solid returns. Isn’t this trading style smooth and effective?

Alright, folks, let's cut the fluff and get straight to the action. Today's stock indices are all over the place, but guess what? Our Strategic Partners are raking in the profits. Don't be naive and overlook the challenges of the stock market.

The election circus? It's not going anywhere—expect it to keep stirring up chaos until at least early November. Don't count on any relief just yet.

Then there's the mess of macro factors and geopolitical turmoil, plus the infamous September-October rollercoaster of the S&P 500 (just take a look at the chart)—this time of year, the market's like a toddler learning to walk: stumbling, constantly pulling back. It's during these months that the market often gets hammered down, finds a crucial low, and then rallies hard into the end of the year.

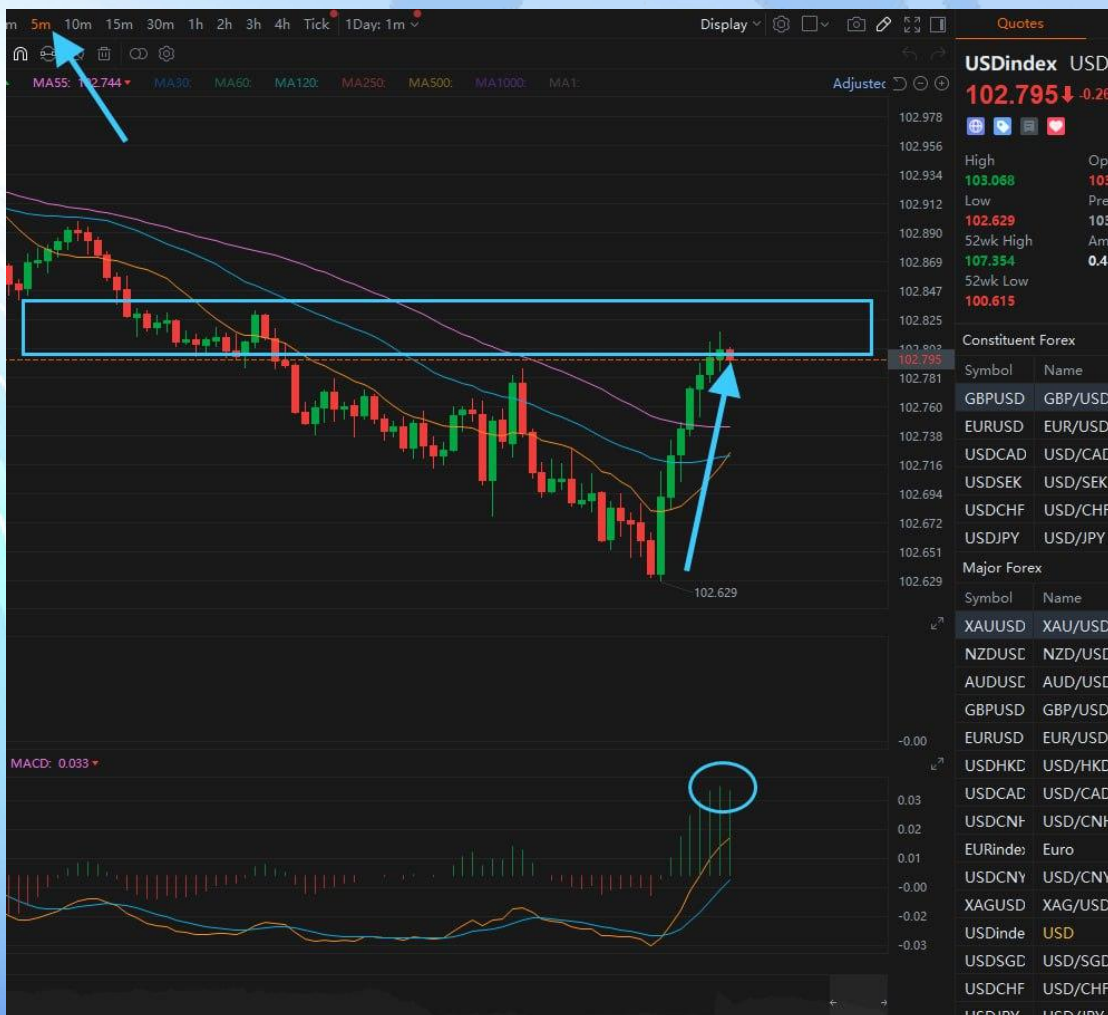

And let's not forget, plenty of pessimistic experts are out there predicting a recession, and the chances of a big Fed rate cut in September? Almost zero. This is prime time for the next president

FB Finance Institute - 15th Session

to step up, claim they've saved the economy, and ride that wave to victory.

So, let's be real: Jumping into our Strategic Partner Profit Plan right now is hands down the best move you can make. Do you agree? How much have you made so far? Get on it now!

Folks, that trade was straight-up fire! The inflation data didn't do much, but the consumer confidence numbers sent the dollar soaring and crypto dipping. We jumped on that immediately, shorting the platform's native token with precision through contracts and locking in profits fast. Then, as the dollar index approached the resistance zone on the 5min chart, we cashed out decisively. The whole thing went down in under 20min—how's that for a rush? Is your adrenaline pumping yet? This is what data driven trading is all about: fast, clear, and absolutely raking in the profits!

To all my comrades, and to those over in Team W, take a good

look at our profit data. Team W members, are you starting to feel the sting of being on the wrong side? Feeling a bit of despair yet?

Check this out: We deployed just 20% of our position, and despite the time differences, our four partner groups have each raked in profits ranging from 60% to 90%. Our total asset return has now skyrocketed to 75%, 101%, 131%, and a mind blowing 170%!

Thank you for your trust, whether you're a seasoned veteran or a new ally. Your support has filled our fund pool/war chest and fueled these incredible victories. Now, cast your valuable vote for me, and let's continue to crush Team W until they're utterly defeated!

AI 4.0

After a week of battling, the results speak for themselves—what are you waiting for? Now is the time to make the smart choice. Standing with me means choosing absolute success. We're going to dominate this crypto ocean and become the undisputed shark kings. Are you ready to embrace this glorious moment of victory?

Folks, are we done here? Absolutely not. Next week, we're not settling for anything mediocre. The Jackson Hole Global Central Banking Conference is on the horizon—the ultimate financial showdown of the year. And guess what? Next Wednesday, I'm launching my master plan with one goal in mind: doubling our total account funds in a single, precision trade!

Why am I so confident?

First off, last week we pulled off six trades with returns of 27%, 38%, 50%, and 67%. And this week? We smashed it with just four trades, sending our returns soaring to 75%, 101%, 131%, and a jaw dropping 170%! Is this kind of growth satisfying enough for you?

Secondly, even though key economic data usually drops in the morning and I typically share in the afternoon, today's performance proves that if I shift my updates to the morning, the impact will be even greater! Today's profit surge has shown us the way forward.

And let's not forget, the Jackson Hole Conference is set to bring market swings even more powerful than the NFP data. With our prep in place, hitting our target in three days is gonna be a walk in the park.

Folks, today marks the beginning of a brand new era, filled with unprecedented challenges and opportunities. I'm absolutely certain that we have everything it takes—every resource, every talent—to achieve greatness. I've meticulously crafted an action plan, optimized our resource allocation, and boosted our team's efficiency through innovative strategies. I promise to lead you in unleashing your full potential, turning every challenge into a glorious victory. So right now, I'm calling on you to seize this moment with unmatched enthusiasm.

Don't hesitate—DM me immediately and join my elite team. Let's sign that contract and secure our mutual success. Support my campaign, and let's supercharge the Strategic Partner Program, the token market value management plan, and the AI 4.0 system presale!

FB Finance Institute - 15th Session

This is a rallying cry to all our warriors—this isn't just a promise of victory, it's your chance to become a legend among your peers. Are you ready to make history? Next week, we're going all out, dominating the crypto world together. Trust me, we will be unstoppable and undefeatable!

And remember, lock in 3:30 PM ET today to hear Prof. Clark's profound insights—his revelations could be the key to our journey towards financial freedom!

Closing Commentary

Dear Friends, Family, and Esteemed Future Investment Masters, good afternoon to you all!

First and foremost, please allow me to extend my deepest gratitude and respect to our two Chief Practical Instructor candidates, the "Wizard" and the "Shark." Their tireless efforts have not only allowed me to focus on critical matters such as the

FB Finance Institute - 15th Session

AI4.0 System and the AI Foundation, but, more importantly, they have demonstrated unparalleled excellence. Their brilliance shines like bright stars, illuminating the path of investment learning within our internal group and igniting the investment passion of many friends. Are you filled with satisfaction and comfort with their shares this week?

I would also like to sincerely thank each and every one of you who have placed your trust in and supported us. As the competition for the Chief Practical Instructor enters the intense second round, our Strategic Partner Investment Cooperation Plan and Institute Token Market Value Management Plan have also reached a new peak. All of this will lay a solid foundation for the promotion, publicity, and pre-sale work before the launch of the AI4.0 System. We are approaching a new milestone, and none of this would be possible without your support and participation.

At this moment, I want to express my heartfelt gratitude. It is a great honor to work alongside you and to strive together for our dreams. We are moving forward hand in hand, embracing a

FB Finance Institute - 15th Session

brighter future. Every step forward, every breakthrough, is driven by the passion and wisdom of many. Let us continue our efforts on this road filled with hope and challenges, and together, write even more glorious chapters!

Dear Friends,

As the weekend approaches, we are greeted with a wonderful moment to unwind and relax.

Perhaps you are ready to celebrate this week's victories with a cigar and fine wine;

Perhaps you are planning to continue working through the weekend, a determination that deserves admiration;

Perhaps you have arranged gatherings with friends and family, enjoying precious moments of togetherness;

Maybe you plan to embark on a spontaneous trip, hoping to encounter unexpected surprises around the corner;

Or perhaps you intend to relax in bed, fully enjoying a moment of peace;

Maybe you are preparing to camp out and welcome tomorrow's

FB Finance Institute - 15th Session

sunlight;

Or perhaps you plan to participate in a volunteer activity,
spreading warmth and love;

Or maybe you intend to engage in a dialogue with your soul,
embracing spiritual rejuvenation...

The beauty of life is everywhere, and every moment is worth our
gratitude and cherishing.

Today, I would like to invite everyone to return to the essence of
investment, to listen to the call of the heart, and to discover a
better version of oneself. We must not only reflect on the past
but also make wise plans for the future. This will be a journey of
wisdom and a heartfelt outlook on what lies ahead!

First, we are currently entering a golden investment period before
the interest rate cut in September. How crucial is this timing?
How should we seize this opportunity? These are the questions
we need to deeply consider.

Second, we will explore how to achieve the goal of “passive

FB Finance Institute - 15th Session

income sufficient to cover daily expenses” or “maintaining our current lifestyle without relying on a salary.” What steps should we take to move toward financial independence, retire early (FIRE)?

These are the themes I wish to share today. Let us explore together and embark on a journey of wisdom toward the future. May you, over this weekend, not only relax and rejuvenate but also approach the upcoming investment opportunities with a mind full of wisdom.

Dear Friends,

Today, I invite everyone to explore a crucial question: What is the true purpose of investing? Some may believe that the ultimate goal of investing is to amass great wealth. However, if we only focus on the accumulation of wealth, we may find that this path does not necessarily lead to genuine satisfaction and happiness.

We need to deeply consider why we need money. Is it to provide a worry free life for our families? Is it to have more leisure time to

FB Finance Institute - 15th Session

enjoy the beauty of life? Is it to travel freely and explore the wonders of the world? Or is it to have the opportunity to pursue beloved activities that we have been unable to achieve due to the busyness of work?

If we do not understand what true happiness is or how to attain it, even with vast amounts of money, we may still fail to truly experience joy. Sometimes, money can become an obstacle to our happiness, even diminishing our inner sense of fulfillment.

True happiness comes from exploring our inner selves and understanding what we truly desire. Only when we have a clear definition of happiness and maintain the right direction in our pursuit of wealth can we ensure that we do not lose our way on the path to happiness while chasing after wealth.

As we strive for wealth, we may find ourselves caught in the trap of working relentlessly for money. Such behaviors often turn us into slaves of money rather than allowing money to serve as a tool to enhance our lives. It is essential for each of us to

understand that our goal should be to make money serve our happiness, not to let it dominate our lives.

Let us deeply reflect on our vision of happiness. True success is not solely measured by the accumulation of wealth but by living a fulfilling and joyful life. Money should be a tool to achieve our dreams, not a burden on our lives. While pursuing wealth, we must always maintain our understanding and pursuit of true happiness.

May each of us find the happiness deep within our hearts and use investment to create more beautiful moments. Let us work together to make money a facilitator of our dreams, not a heavy burden on our lives. I wish everyone steadfast steps, a fulfilled heart, and the ability to cherish every beautiful moment on the path to happiness!

When we delve deeply into the true meaning of money, it is worth exploring a more practical question: How can we more effectively achieve FIRE? In this process, understanding and

leveraging investment opportunities is particularly crucial.

Recently, due to various factors such as market trends and the AI4.0 System testing, I have shared with you many insights into cryptocurrency investment logic. These insights are not only practically significant but also provide important references for achieving financial freedom:

1. The Treasure Map of BTC

By analyzing the creation mechanism of Bitcoin and the data from the past three bull markets, we can conservatively estimate that, based on a minimum increase of 2,187%, the price of BTC in this bull market could rise from \$16,000 at the beginning of 2023 to over \$350,000.

This data chart reveals an unprecedented investment opportunity, filling us with anticipation for the future.

2. Mr. M's Story

Mr. M purchased 5,000 Bitcoins when the price was less than \$1. However, in pursuit of short-term profits, he sold most of his

Bitcoins during multiple market peaks. Although Bitcoin did experience pullbacks after each sale, the value skyrocketed due to the bull markets triggered by the halving effect, leading him to miss out on potential gains worth hundreds of millions of dollars. This story warns us that having a broad macro perspective is fundamental to achieving financial freedom.

3. Berkshire Hathaway vs. BTC Logic

By comparing traditional and modern investments, we find that Berkshire Hathaway grew by 3,787,464% over 59 years from 1964 to 2023, with a compound annual growth rate (CAGR) of approximately 19.8%. In contrast, over the past five years, Bitcoin's CAGR has been around 40%. Based on the previously mentioned \$57,000 per Bitcoin, even if the annual growth rate decreases by 1%, Bitcoin's price could still reach \$13.68 million within the next 20 years.

This data highlights the immense potential of modern investments and provides us with valuable opportunities for wealth growth!

With the completion of the halving mechanism and the

introduction of cryptocurrency spot ETFs, institutional investors are flocking to the market, making this bull market increasingly promising. Although bipartisan competition has slowed progress, it has also made the market more resilient. There is no doubt that the cryptocurrency market offers a fast track to achieving FIRE.

So, how many Bitcoins are actually needed to achieve FIRE? FIRE (Financial Independence Retire Early) refers to achieving financial independence through savings and investments, allowing one to retire early while still relatively young.

The definition of financial freedom may vary. From an accounting perspective, it means that the passive income generated from your net assets is sufficient to cover daily expenses. In terms of production relations, it means that when you can "retire" early without relying on salary income and still maintain your current lifestyle, you have achieved financial freedom.

Let us think rationally and arrive at a clear conclusion:

1. Reasonable Savings and Investment

FB Finance Institute - 15th Session

Achieving FIRE requires a reasonable savings rate and long term trust in investment targets. Bitcoin, as an asset with immense potential, is worth considering as a primary choice.

2. Personalized Goal Setting

The specific goal of financial freedom should be set based on individual lifestyle needs and expected living standards. Since everyone's needs are different, the amount of Bitcoin required will also vary.

3. The Power of a High Savings Rate:

High savings rate can significantly shorten the time needed to achieve financial freedom, but this requires personal persistence and effort.

Dear Friends,

While saving is indeed a good habit, the true objective lies in achieving wealth growth through stable and excessive compounding. In this process, the principal and compounding capability are the key factors.

Bitcoin, with its impressive compound annual growth rate (CAGR) of 40%, offers tremendous potential for our investments. Let us explore how to achieve FIRE through a conservative calculation.

Assume the following market trend for Bitcoin over the next six years:

- 2025 remains in a bull market, 2026 enters a bear market, and 2027-2029 sees another bull market: that is, three years of bull market followed by one year of bear market.

- Then, assuming Bitcoin reaches an ideal price point, we calculate its future value using a conservative CAGR of 20%. What astonishing results might we obtain from this?

If you believe that an annual passive income of \$100,000 is necessary to achieve financial freedom (meaning you can maintain your current lifestyle without relying on work income) we can determine how much you need to invest in Bitcoin now using the following calculation formula:

$$P * 1.2 * 1.2 * 1.2 * 1.2 * 1.2 * 1.2 * 0.2 = 100,000$$

The calculation steps are as follows:

1. Compound Growth Calculation: $1.2 * 1.2 * 1.2 * 1.2 * 1.2 * 1.2 = 2.986$

2. Applying the Conservative Annual Growth Rate:

The value 0.2 represents a 20% CAGR starting in 2030.

Using this formula, you can derive the required principal

$$P = 100,000 / (2.986 * 0.2) \approx \$167,448$$

This means that you would need to invest approximately \$167,448 now to achieve an annual passive income of \$100,000 after six years.

If you wish to shorten the time to achieve FIRE to three years, keeping all other parameters the same, the principal required now would be calculated as follows:

$$100000 / (1.2 * 1.2 * 1.2 * 0.2) = \$289,352$$

Dear Friends,

Our recent calculations clearly demonstrate the direct relationship between time and investment amount—if you aim to achieve financial freedom in a shorter period, a higher initial investment is required. This also underscores the unparalleled value and potential of early investments.

If an annual passive income of \$100,000 is sufficient to satisfy you, then you can plan accordingly by gathering the necessary capital over a 3-year or 6-year period. If your annual expenses exceed \$200,000 or \$400,000, you should proportionally increase your investment. More investment not only brings more future passive income but also significantly enhances the quality of your retirement life.

I hope these calculations and data help you better understand the enormous potential of Bitcoin investments, enabling you to make informed decisions on your path to financial freedom. Let us work together toward a more fulfilling and prosperous future!

If you are eager to achieve this goal more quickly, now is an excellent opportunity. The current Strategic Partner Investment

FB Finance Institute - 15th Session

Cooperation Plan offers a powerful platform, providing an ideal opportunity to reward supporters, cultivate partnerships, and achieve mutual success before the launch of Ai4.0.

At this triumphant moment, we can proudly survey the market with the posture of victors. Despite the rebound in stock indices this week, our Strategic Partner Program is propelling our wealth to grow rapidly.

I personally took the time to provide guidance to the "Executive Strategic Partner" and "Managing Director of Strategic Partnerships" partner groups. In two trades this week, they achieved remarkable results—total asset returns of 204% and 263%, respectively. This proves the advantage of large capital accounts, which can achieve excess returns through less frequent trades and larger cycle chart analysis.

This week, the two outstanding instructors, the "Option Wizard" and the "Crypto Shark," each led their teams to record four successful trades. The total asset returns for the four partner

FB Finance Institute - 15th Session

groups they led are as follows:

Wizard:

- Associate Strategic Partner: 54.63%
- Intermediate Strategic Partner: 77.35%
- Senior Strategic Partner: 104.01%
- Principal Strategic Partner: 140.39%

Shark:

- Associate Strategic Partner: 75.55%
- Intermediate Strategic Partner: 101.26%
- Senior Strategic Partner: 131.05%
- Principal Strategic Partner: 170.04%

Currently, the Shark is slightly ahead, showcasing his precise and bold trading style. He has fully utilized the advantages of the α & β Trading System, a branch of the Ai4.0 System, with each operation being impressive. In some aspects, his performance has truly surprised me—the youthful is to be admired and feared! The Wizard's team also performed excellently and continues to strive

for greater achievements.

Looking ahead, both have set higher goals for next week, and we eagerly anticipate more surprises and breakthroughs from them.

Dear Friends,

Next week, we will witness the annual Jackson Hole Economic Symposium, one of the most important economic conferences globally. The symposium will be held in Jackson Hole, Wyoming, and is hosted by the Federal Reserve Bank of Kansas City. It brings together central bank governors, economists, and financial experts from around the world to discuss global economic and monetary policy.

Both the Wizard and the Shark are brimming with confidence about the market opportunities next week. The Wizard has set a bold target of achieving 300%-1000% profit in a single trade, while the Shark plans to double the total assets. These ambitious plans are closely tied to the upcoming symposium.

The Jackson Hole conference has historically had a significant impact on the markets, including:

1. **Policy Direction Guidance:** The discussions on global economic trends and monetary policy at the symposium provide important clues for future policy directions. For example, the 2008 meeting mentioned quantitative easing policies, which had a profound impact on the global economy.

2. **Market Expectation Shaping:** The content of the symposium often influences market expectations and investment decisions. The discussions in 2010, for instance, had a major impact on the markets.

3. **Catalyst for Policy Adjustments:** The symposium often serves as a catalyst for monetary policy adjustments, such as when the Federal Reserve announced the end of the quantitative easing program in 2014.

4. **Global Policy Coordination:** The conference promotes policy

coordination among global central banks, helping to address economic challenges.

At this exhilarating moment, our partner groups is fully prepared to seize the immense opportunities that lie ahead. The upcoming Jackson Hole Economic Symposium next week will mark a new starting point for a leap in wealth, and we are poised at this critical juncture, ready to ride the waves!

I understand that many novice cryptocurrency investors have encountered issues with bank wire transfers being blocked. This is not only a battle between decentralization and centralization but also part of the challenges you face on your journey to financial freedom.

Don't worry; you can opt for international wire transfers or face to face cash transactions. Especially with face to face transactions, you can completely bypass the cumbersome bank procedures, allowing you to complete your transaction quickly and immediately join our path to success!

FB Finance Institute - 15th Session

Now is the best time to take action. Our Strategic Partner Program is not just an ambitious goal; it is your last chance for exponential growth and financial freedom.

This is a journey of transformation, and particularly in the coming week, boldly embracing opportunities will be your perfect moment to reach the pinnacle of wealth!

Let us unite, forge ahead, and grasp this exceptional opportunity to create a brighter future together! Wishing everyone a wonderful weekend!

AI 4.0
