Good morning, dear students and partners. I am James Wilson.

Today marks the final trading day of the week and the "Decisive Day" for Phase Two—a critical moment that will determine victory or defeat. So far, our team has significantly outpaced Mr. Shark in returns, showcasing our superior strategy and execution! However, we will not allow ourselves to become complacent. I will continue leading you in the live market, searching for more trading opportunities to solidify our victory and ensure we

**FB Finance Institute - 15th Session**

conclude this phase with an overwhelming advantage. Let's stay focused and give it our all to secure the ultimate victory!

On the data front: The U.S. core PCE price index for July rose 2.6% year over year and 0.2% month over month, both holding steady from previous values. This is the Fed's "favorite" inflation measure. The fact that the core PCE price index did not continue to expand suggests that inflation is moving toward the Fed's target, further boosting expectations of a slight rate cut in September.

Earlier, we discussed the reasoning behind NVIDIA's stock price decline. Despite an impressive earnings report, the stock still triggered significant selling by investors. The reason lies in "high expectations." For investors who held high hopes, NVIDIA's Q3 revenue outlook, which was only \$2 billion above the market average, simply wasn't enough. The same logic applies to interest rate cuts: the market isn't just looking for a 25 basis point reduction; it's hoping for a substantial cut to release more liquidity. This is why the outlook for the stock market remains

bearish in the short term, even though it may be positive in the long run.

But time is money, and who has the luxury to wait for long term benefits? The longer the time frame, the greater the risk. Over such an extended period, who knows what might happen? War? Natural disasters? Human made catastrophes? We can't predict the future. The only certainty in life is its uncertainty. That's why I always urge everyone to seize the present. If you live each day to the fullest, you're already in control of your future.

I'm fully aware that the ultimate goal of investing is to make money. Theoretically, the more you earn, the better, but in reality, the investment cycle is equally crucial. Given the choice between a 5000% return over ten years and a 500% return in six months, I would choose the latter without hesitation. Why? Because the future is inherently uncertain.

Looking at NVIDIA's earnings report, the numbers aren't bad—\$30 billion in revenue, a 122% year over year increase, and

a net profit growth of 168% to \$16.6 billion, all in line with market expectations. But the surprise factor is gone. This trillion dollar giant, once the symbol of a meteoric rise, is now showing signs of slowing down. As the leader in the AI industry, NVIDIA's performance is often seen as a barometer for the entire AI sector, and even the global market. If demand for their AI chips remains strong, the AI-driven "wealth creation frenzy" could continue. However, as the cards have now been laid on the table, NVIDIA's board approved an additional \$50 billion stock buyback to soothe shareholders' concerns.

But this doesn't truly reassure investors, because during the "earnings call", Jensen Huang couldn't address the market's most pressing questions.

### **What are the market's biggest concerns?**

First, whether NVIDIA can maintain its strong technological edge. Before the earnings call, industry insiders already knew that Jensen Huang's highly anticipated Blackwell chip was facing

production "delays." Huang had confidently stated during the Q1 earnings call that Blackwell would significantly contribute to the company's revenue this year. However, on the day of the Q2 earnings report, CFO Colette Kress acknowledged production issues with Blackwell, indicating that the company is working on design improvements to boost output, with shipments now postponed to the fourth fiscal quarter. This has raised significant concerns about NVIDIA's future growth.

Second, whether big tech companies can truly profit from AI to sustain this ongoing boom. This is crucial because the level of investment from major tech firms in AI is enormous. While it hasn't reached the extremes of the 2000 dot-com bubble, it still poses a considerable risk. The market was looking to NVIDIA's earnings report to see if their customers are actually making tangible profits from their AI investments.

Jensen Huang didn't directly address either of these concerns. Instead, to calm shareholders, he approved an additional \$50 billion stock buyback. What does this indicate? It suggests that a

crisis is already looming.

Dear friends, we've spotted a promising signal. Please pay attention to the group messages!

We're ready to claim our 14th win!

**Everyone loves making money through investments, so I categorize investments into four types to help everyone better understand their options:**

First, Bank Savings

Second, Stocks

Third, Cryptocurrencies

Fourth, ICO Investments

From my perspective, relying solely on bank savings as an investment strategy is somewhat unfortunate. While bank deposits are safe, the returns are minimal, barely keeping up with inflation. Over time, the real purchasing power of savings

**FB Finance Institute - 15th Session**

diminishes.

Ordinary people often limit themselves to bank savings because of limited knowledge and resources. This restricts their opportunities to grow wealth and prevents them from achieving financial freedom through investments in stocks, bonds, funds, cryptocurrencies, and other avenues.

This situation underscores the importance of financial education. I aim to help more people break free from the limitations of traditional saving methods and realize the potential of effective wealth management and growth.

Congratulations to all our partners! This recent trade was brief, but it brought us quite decent returns—options contracts have seen nine wins out of ten, and we've achieved our fourteenth consecutive win in cryptocurrency contracts! Just as I mentioned earlier, options trading is like a multiple choice test—challenging. In contrast, cryptocurrency contracts are like a single choice test—much simpler. As long as we choose the right direction, we're guaranteed to make money! Applying an options mindset to cryptocurrency trading is a form of strategic domination.

We are well on our way to easily completing the challenge of 20 consecutive wins! And we will undoubtedly defeat Mr. Shark's team. I want him to understand one thing: your success in making money isn't because of some advanced technique; it's because the cryptocurrency market is so straightforward! You've simply benefited from the market's opportunities. Now we all know that the cryptocurrency market doesn't require complex, sophisticated techniques to conquer—it's something we all have the chance to achieve!

Congratulations again to our team. We will be the ultimate victors!  
Now, go ahead and cast your votes for me with enthusiasm!

## Second, Investing in Stocks

Investing in stocks can indeed be a good choice. Compared to leaving money in the bank, I believe putting it into the stock market is far better. Bank returns are low and will never lead to financial independence, but the stock market offers a chance to achieve that goal over time. While this process may take a considerable amount of time, the potential returns far exceed what you can get from a bank.

However, trading stocks comes with its share of frustrations. For instance, do the fluctuations of the stock market often make you feel anxious and uneasy? Have you ever regretted your investment decisions after realizing you chose the wrong stock? This sense of disappointment can be particularly strong when, after holding a stock for six months or even a year, you see other stocks outperforming it. In the U.S. stock market, long term investing is the norm, but when you see other stocks rising more

rapidly, that feeling of having missed out can be devastating.

This is why we're trading cryptocurrencies at this moment—because cryptocurrencies don't come with those headaches. With the same strategies, the same mindset, the same capital, the same time frame, and the same person trading, the results are better in the cryptocurrency market. The smooth progress of our 20 win strategy has proven my point to be correct.

**However, I believe that none of the aforementioned options can truly compare to an ICO project, whether it's a bank, stocks, or cryptocurrency contracts. The advantages they possess are also found in ICO projects, but the unique benefits of ICOs are unmatched by the others.**

#### 1. Compared to Bank

- Banks offer the advantage of no risk, but the downside is that the returns are minimal, and wealth can easily shrink over time.
- ICO projects, once the progress bar reaches 100%, also have no

risk, but with the certainty that wealth will significantly increase.

## 2. Compared to Stocks

- Stocks have the potential for substantial returns, but the process is long, choices are difficult, and you could end up losing money after wasting a lot of time.
- ICO projects have a short time frame, require no complex choices, are worry free, and offer returns far exceeding those of stocks.

## 3. Compared to Cryptocurrency Contracts

- Cryptocurrency contracts are simple, highly profitable, and offer short cycles—but they come with risk.
- ICO projects are equally simple, highly profitable, but without any risk!

In summary, an excellent ICO project stands out as the best investment option right now. Although it has a very clear drawback: finding a quality ICO project is challenging and requires a lot of time and effort. But, as humanity progresses, so does

society, and the same applies to trading platforms. Their role, aside from providing better services, is to filter all ICO projects and bring in only the best to attract more users. Doesn't this save us a lot of time and effort?

Given all these points, isn't it clear that ICO projects outshine any other investment option?

A screenshot of a mobile application interface titled "Initial Offer". The page shows details for a BCX token subscription. A red arrow points to a red-bordered box containing the text "126057840.0917 / 45000000.00" and "280.128533%". The interface includes tabs for "Subscribe" and "Allocation", and sub-tabs for "In Subscribe", "My Subscriptions", and "My Winnings".

| Field                             | Value                                       |
|-----------------------------------|---|

| Subscription Lower Limit (Tokens) | 250.00                                      |
| Subscription Upper Limit (Tokens) | 10000000.00                                 |

As I mentioned earlier, I want to help more people break through the limitations of making money and achieve better wealth management and growth. You can take inspiration from my approach. As an ordinary person without a privileged background, I managed to go from zero to financial freedom. I believe you can do it too. Friends, our thinking determines our destiny, and our vision sets the height we can reach.

You can clearly see that the BCX progress bar has already exceeded 280%! What does that mean? The inflow of funds continues to increase steadily. How high will it go? 300%? 500%? I'm not sure. The only thing I am certain of is this: the funds you've invested and successfully allocated in the ICO are already yielding a 2.8x return! The larger the amount you invest, the higher your chance of success, and the greater your guaranteed profit!

In markets that are often unfair, Wall Street tycoons have always made their money this way—it's just that the mechanisms are not transparent to everyone. But what is the spirit of cryptocurrency?

**FB Finance Institute - 15th Session**

Decentralization! Freedom, transparency, and innovation! Isn't the spirit of cryptocurrency the embodiment of the American spirit? So, here's my message to all of you: Go all in on BCX! What you need isn't a cautious investment; you need an all out effort that will decide your fate!

Friends, this afternoon, Professor Clark will take the stage! What surprises and updates will the professor bring us this time? Let's all look forward to his arrival together!

---

## Closing Commentary

Dear Friends, Family, and Esteemed Future Investment Masters,

Good afternoon! I hope your spirits are as bright as the sunshine!

As the holiday season approaches, I understand that everyone is in a different state of mind: some are confidently secure, others

**FB Finance Institute - 15th Session**

are striving hard, some are basking in the joy of their harvest, while others are just beginning their journey. Each of your efforts and achievements deeply moves me. Your progress and determination not only fill me with pride but also empower me to reach even greater heights!

In the face of the AI era's transformation and the thrilling opportunities presented by cryptocurrency, our bold initiatives—internal testing, token market cap management, the Strategic Partner Program, and high-quality IDO investments—place us at the forefront of investment. We are entering an unprecedented golden age of investment!

I extend my heartfelt thanks to everyone who participated in this internal session, especially to our two candidates for their hard work, and to the relentless efforts of the Ai4.0 team. It is your perseverance that brings us closer to the pre-sale of the Ai4.0 system, the global agent plan, and the listing plan. Our dreams are within reach, and the institute is about to reach a new milestone. The era that belongs to each and every one of us has

**FB Finance Institute - 15th Session**

arrived!

Although we have achieved some exhilarating successes, the true excitement is just beginning. The moment of realizing our dreams is the ultimate goal of our endeavors! At this moment, I would like to ask everyone a question: Are you satisfied with your current returns?

As Steve Jobs once said, "The only way to do great work is to love what you do." Dream big and dare to fail—this phrase inspired me and the founding team at the inception of the Ai4.0 system. We were led by our dreams, unafraid of challenges!

The Ai4.0 system carries the historic mission of "making more families happier." Our investments and creations are not only a pursuit of changing destinies but also a legend written by a group of brave individuals who strive for their dreams, dare to take risks, and continuously advance. This spirit is inspiring us to keep pushing boundaries and moving forward with determination!

As Herman Cain said, "Success is not the key to happiness. Happiness is the key to success. If you love what you are doing, you will be successful." Now, I would like to ask everyone again, as a member of the dream-chasing team behind the Ai4.0 system, is your sense of happiness, like mine, also growing continuously on this journey?

The screenshot shows a mobile application interface for an 'Initial Offer' of BCX tokens. The interface includes a navigation bar with 'Subscribe' and 'Allocation' tabs, and a sub-navigation bar with 'In Subscribe', 'My Subscriptions', and 'My Winnings' options. The main content area displays the following details:

| Field                             | Value                      |
|-----------------------------------|----------------------------|
| Subscription Start Time           | 08/29/2024, 12 AM          |
| Subscription End Time             | 09/05/2024, 12 AM          |
| Winning Announcement Time         | 09/05/2024, 12 PM          |
| Issuance Quantity                 | 144180943.00 / 45000000.00 |
| Subscription Price                | 4.00 USDT                  |
| Subscription Lower Limit (Tokens) | 250.00                     |
| Subscription Upper Limit (Tokens) | 10000000.00                |

A progress bar below the Issuance Quantity shows 320.402095% completion. A red circle highlights the Issuance Quantity text. At the bottom, it says 'No more'.

Dear Friends,

"The journey of a thousand miles begins with one step." We do not fear failure because we possess the courage and ability to face challenges head-on. From the early stages of significant index fluctuations to confronting new challenges now, our boldly implemented Strategic Partner Program has helped us surpass most investors.

At present, the BCX IDO is not only crucial in achieving the foundational profit goals (300%-1000%) of our Strategic Partner Investment Cooperation Plan, but it also represents a key step and a new starting point for our takeoff!

Take a look—the online subscription progress bar for BCX has already exceeded 320%, which means:

- The amount raised during the IDO phase has surpassed \$5.76 billion (calculated as  $3.2 * 45000000 * 4 = 5.76$  billion).
- The data suggests that BCX's listing price at opening will exceed \$12.8.

Overall:

- BCX's IDO are in a state of high demand, and subsequent data and the anticipated opening price will rise significantly.
- The risk of participating now is minimal.
- By participating now, you can still gain the advantage of priority timing and secure a higher allocation rate.

When you deeply understand the formation mechanism of progress data during the IDO online subscription phase and its relationship with price, you'll discover that the significant difference between a quality IDO and an IPO lies in its high level of transparency. This transparency allows us to clearly see the market status and future expectations, providing us with valuable insights.

These insights reveal that participating in a quality IDO is not just about short-term profits but also about gaining a deep understanding of market dynamics and grasping future trends. When we can accurately interpret these key data points, we pave our way to a path of risk-free high returns!

**FB Finance Institute - 15th Session**

Currently, the "Wizard" team is significantly leading in profits, with their four partner groups achieving returns of 141%-383%. Meanwhile, the "Shark" team, though slightly lower with returns of 125%-314%, still strongly recommends full participation.

**Thus, participating in the BCX IDO has become crucial:**

- It's a risk-free, high-return investment opportunity.
- It will determine the speed at which we achieve the foundational goals of our Strategic Partner Program. The larger the capital and the earlier the participation, the easier it will be to achieve the 300%-1000% foundational target.
- It impacts the strategic outcomes of the "Wizard" and "Shark" teams this week, which is also the final phase of the second-round competition.
- Your starting point after BCX's listing will determine how high you can go!

**Important Information**

Dear Friends, in light of the overwhelming interest in the BCX IDO project and its clear profit potential, we have decided to adjust

**FB Finance Institute - 15th Session**

the rules for the final phase of the second-round competition for the next Chief Practical Instructor. This adjustment aims to significantly enhance the profitability levels for all participants and Ai4.0 system supporters. The new rules are as follows:

1. The moment the BCX token is listed, the profit levels of the Wizard team and the Shark team will determine who the winner is!

2. Reward Mechanism:

- The winning instructor will continue to lead the Senior Strategic Partner and Principal Strategic Partner teams, pushing towards new strategic partner goals. The runner-up will lead the Associate Strategic Partner and Intermediate Strategic Partner teams.
- The winning instructor will effectively secure the role of the next (16th) Chief Practical Instructor. They will receive a \$10 million cash reward and the honor of becoming a member of the Institute Foundation's Board of Directors.

- Supporters of the winning instructor will receive one year of free access to the institutional edition of the Ai4.0 investment system (valued at \$1 million).
- Outstanding supporters will have the opportunity to obtain regional licensing or regional distribution rights before the Ai4.0 system's public launch, as well as invitations to participate in the Ai4.0 launch event.

This adjustment is designed to further motivate our teams to strive for excellence. Let's come together and work towards achieving even higher goals!

Dear Friends,

# AI 4.0

Today, we've made a slight adjustment to the rules, not only for the sake of fairness and motivation but also because the profit opportunity presented by BCX is truly exceptional. As experienced stock investors, we are familiar with the excitement of high-quality IPOs, but entering the world of premium IDOs/ICOs

**FB Finance Institute - 15th Session**

elevates that excitement to an entirely new level. Have you fully recognized its unique allure?

1. High-Efficiency Decision-Making: Investing in an IDO/ICO grants you tokens without decision-making power. This shift from ownership to usage rights reduces internal friction and accelerates the growth of tech industries!

2. Unprecedented Rapid Fundraising: The speed of fundraising through IDOs/ICOs far exceeds traditional methods, enabling startups to quickly advance product development and market entry while allowing investors to profit in a short time frame (such as within a week).

3. Global Investor Appeal: IDOs/ICOs break geographical boundaries, attracting global investors, significantly increasing both funding sources and market attention.

4. Lower Entry Barriers: The entry barriers for IDOs/ICOs are low, allowing startups to raise funds directly from the public without

the need for complex procedures.

5. High-Tech Attributes: The combination of blockchain technology and tokens places IDOs/ICOs ahead of traditional industries.

This is the unique charm of the cryptocurrency market—it has become a core component of the wealth matrix. Compared to traditional investment methods like contract trading, spot trading, and stock market IPOs, the advantages of IDOs are clear. So, when an extraordinary opportunity is in front of us, why settle for the ordinary? Why limit ourselves to the current competition rules? Wouldn't you agree?

Excellent! With this heightened awareness, today I will share with you the golden keys to unlocking the treasure of IDOs, specifically tailored for BCX. These strategies are not just recommendations; they are your secret weapons for quickly rising in the field of IDO investments, enabling you to confidently become an ICO/IDO investment expert.

## **Golden Key 1: The Early Bird Gets the Worm**

In the realm of IDOs, being early is not just about timing—it's about seizing destiny. The moment the BCX subscription window opens, every second of delay puts you at a disadvantage.

If you've already joined the battle, give yourself a round of applause—your foresight has placed you ahead of the latecomers.

For those who have not yet participated, the clock is ticking faster, and hesitation not only steals time but also steals opportunities.

## **Golden Key 2: Increase Your Investment**

In a world where the progress bar surpasses 100%, meaning zero loss, why hold back?

The allure of IDOs lies in the fact that the funds allocated will await the listing, while unallocated funds will return to you unharmed.

If you win, the rewards are limitless. Considering the legendary returns in the cryptocurrency market, BCX's potential is enormous

as well.

The universe is inviting you to turn dreams into reality—why play small when you can aim for greatness?

### **Golden Key 3: Use Every Penny**

Follow the principle of "the more, the better," and ensure that every asset in your account is ready for action. Then, boldly enter the subscription interface and commit all your assets in one go. This strategy, while well-known to seasoned investors, remains eternally effective!

### **Golden Key 4: Participate During the Golden Hour**

Just like the strategic timing in stock IPOs, IDO allocations favor the vigilant.

Align your entry time with the opening bell of the subscription phase or peak global market hours to maximize your chances of securing a favorable allocation.

This is not just about being early; it's about being wise!

## **Golden Key 5: The Power of Persistence**

Imagine you've taken action today, and tomorrow you have additional resources at your disposal.

The door to the IDO remains open, inviting you to reinforce your position—every extra contribution elevates your status as a valued investor and increases your allocation share.

When the time is right, BCX's IDO is not just an investment; it's a beacon guiding you toward prosperity!

## **Golden Key 6: Fully Leverage and Optimize the Power of the Funding Pool**

In the investment world, a green VIP channel is like a golden key to success. It's rare, but once secured, it's equivalent to having a free pass to 100% of the highest allocation! Therefore, securing the BCX green channel has become our top priority, and the only way to achieve this is through unity and collective effort!

Firstly, even if we do not secure the green channel, your efforts

can still give you an advantage in allocation percentages over regular investors.

The rules for the green channel usually favor early investors, premium investors, influential investors, and institutions, but the key factor is contribution. Fortunately, with the strength of our funding pool, we can significantly enhance our contribution level.

Moreover, as our institute is a strategic partner with the trading center—which not only issued our tokens but also sponsored the Ai4.0 Beta testing—we have even more opportunities for future collaboration in projects such as the AI Academy, AI Foundation, and AI Trading Center.

I am actively negotiating with relevant parties to secure additional advantages. Even if we do not obtain the green channel, we will strive to gain attention and benefits within the existing rules.

The conclusion is clear: Only with everyone's full commitment can

**FB Finance Institute - 15th Session**

I maximize our collective impact. We need the full engagement of every member to truly open this golden door. Do we all understand the importance of this?

Dear Friends,

The significance of BCX is unparalleled—it's not only a risk-free pathway to achieving your Strategic Partner goals (realizing 300%-1000% asset returns ahead of schedule), but it will also drive forward our Institute's token market value management, the Ai4.0 system pre-sale, the global agent plan, and our listing plans in their entirety!

We now hold the golden keys to unlocking this treasure, and the time to act is now!

As the saying goes, "Success usually comes to those who are too busy to be looking for it."

If you, like me, are fully committed, share your passion with me and join my inner circle. I am confident that as like-minded individuals pursuing our dreams together, we can achieve

**FB Finance Institute - 15th Session**

extraordinary things!

Remember: “It does not matter how slowly you go as long as you do not stop.” I believe: “The harder we work, the luckier we get.”

Dream it. Believe it. Build it.

Wishing you all a wonderful weekend!

---
